1 Overview

The TAS5630DKD2EVM PurePath™ HD customer evaluation module demonstrates the integrated circuit TAS5630DKD from Texas Instruments (TI).

The TAS5630DKD is a high-performance, integrated Stereo Feedback Analog-Input Digital Amplifier Power Stage designed to drive 4Ω speakers at up to 300W per channel. This amplifier requires only a simple passive demodulation filter to deliver high-quality, high-efficiency audio amplification.

This EVM is configured with 2 BTL channels and the possibility to apply either a single ended or a differential analog input signal.

The OPA1632 is a High Performance Fully Differential Audio Op Amp designed to allow operation with single ended or differential input signals to the EVM.

This EVM is a complete stereo analog input 2 × 300 W power amplifier ready for evaluation and great music.

Table 1. TAS5630DKD2EVM Specification

Key Parameters	
Output stage supply voltage	25 V – 50 V
Number of channels	2 × BTL, 1 × PBTL
Load impedance	4–8 Ω
Output power, 4 Ω, 10% THD	310 W
Output power, 8 Ω, 10% THD	175 W
Dynamic Range	>100 dB(A)
SE to Differential Amplifier	OPA1632D
Output stage	TAS5630DKD
Other features	+15 V on-board switcher from PVDD supply

This document covers EVM specifications, audio performance and power efficiency measurements graphs, and design documentation that includes schematics, parts list, layout, and mechanical design.

1.1 TAS5630DKD2EVM Features

- Stereo PurePath™ HD evaluation module.
- Self-contained protection system (short circuit and thermal).

- Standard 1VRMS single ended line input or differential input.
- Double-sided, plated-through PCB layout.

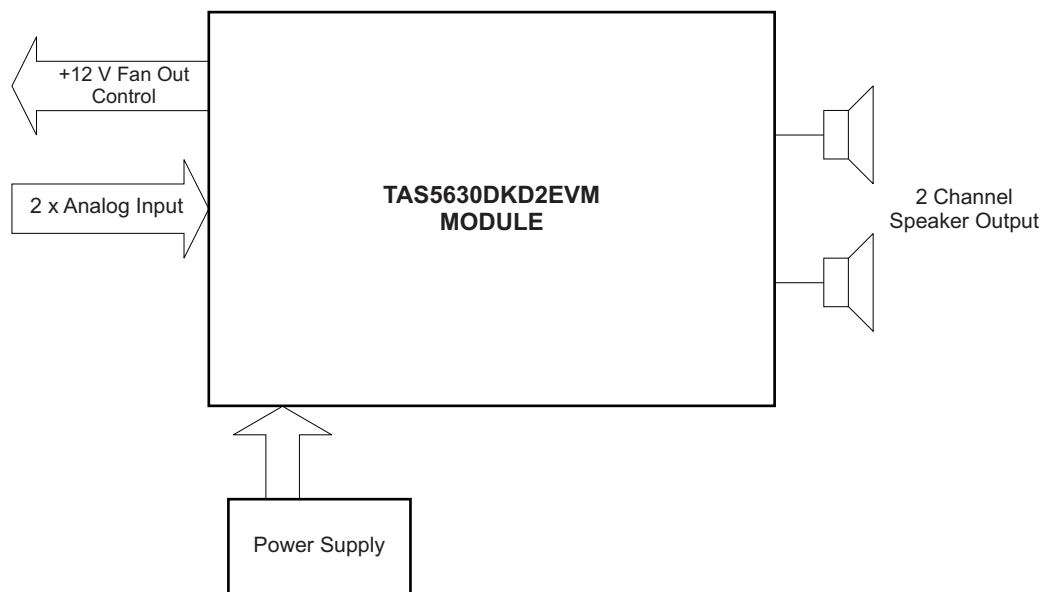

Figure 1. Integrated PurePath™ HD Amplifier System

1.2 PCB Key Map

Physical structure for the TAS5630DKD2EVM is illustrated in [Figure 2](#).

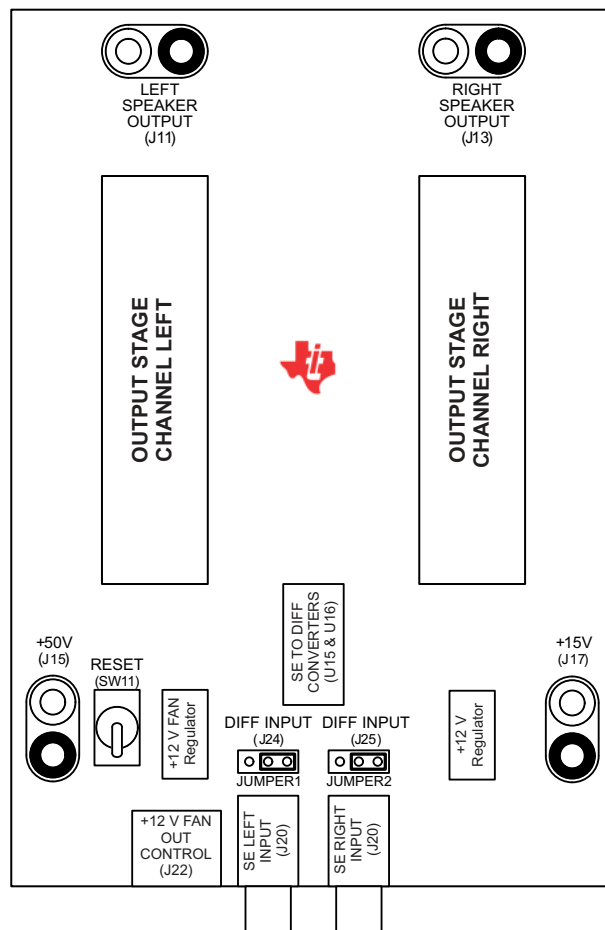

Figure 2. Physical Structure for the TAS5630PHDEVM (Approximate Layout)

2 Quick Setup Guide

This chapter describes the TAS5630DKD2EVM board in regards to power supply and system interfaces. The chapter provides information regarding handling and unpacking, absolute operating conditions, and a description of the factory default switch and jumper configuration.

This section provides a step-by-step guide to configuring the TAS5630DKD2EVM for device evaluation

2.1 Electrostatic Discharge Warning

Many of the components on the TAS5630DKD2EVM are susceptible to damage by electrostatic discharge (ESD). Customers are advised to observe proper ESD handling precautions when unpacking and handling the EVM, including the use of a grounded wrist strap at an approved ESD workstation.

CAUTION

Failure to observe ESD handling procedures may result in damage to EVM components.

2.2 Unpacking the EVM

On opening the TAS5630DKD2EVM package, ensure that the following items are included:

- 1 pc. TAS5630DKD2EVM board using one TAS5630DKD.

- 1 pc. PurePath CD-ROM.

If any of the items are missing, contact the Texas Instruments Product Information Center nearest you to inquire about a replacement.

2.3 Power Supply Setup

To power up the EVM, one power supply are needed. An onboard switched voltage regulator is supplying system power, logic and gate-drive. Power supply is connected to the EVM using connector J15.

NOTE: While powering up set switch SW11 to the RESET position.

Table 2. Recommended Supply Voltages

Description	Voltage Limitations	Current Requirement	Cable
Output stage power supply	25 – 50 V	16 A	J15 (marked +50V)

CAUTION

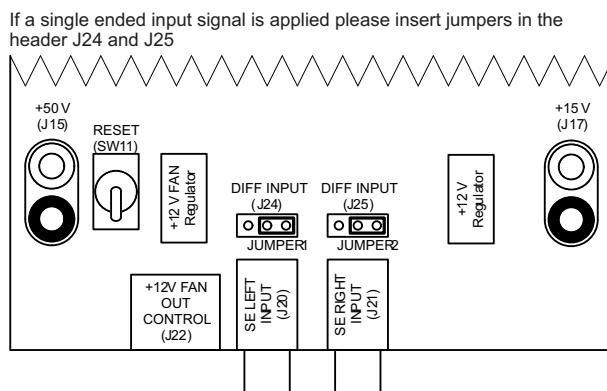

Applying voltages above the limitations given in may cause permanent damage to your hardware

NOTE: The length of power supply cable must be minimized. Increasing length of PSU cable is equal to increasing the distortion for the amplifier at high output levels and low frequencies.

2.4 Applying Input Signal

It is possible to apply either a single ended input signal to J20 and J21 or a differential input signal to J24 and J25.

NOTE: If a single ended input signal is applied insert jumpers in the header J24 and J25.

2.5 Speaker Connection

CAUTION

Both positive and negative speaker outputs are floating and may not be connected to ground (e.g., through an oscilloscope).

3 Protection

This section describes the short-circuit protection and fault-reporting circuitry of the TAS5630 device.

3.1 Short-Circuit Protection and Fault-Reporting Circuitry

The TAS5630 is a self-protecting device that provides fault reporting (including high-temperature protection and short-circuit protection). The TAS5630 is configured in back-end auto-recovery mode, and therefore; resets automatically after all errors (M1, M2, and M3 is set low); see the data sheet ([SLES220](#)) for further explanation. This mean that the device restart itself after an error occasion and report through the \overline{SD} error signal.

3.2 Fault Reporting

The \overline{OTW} and \overline{SD} outputs from TAS5630 indicate fault conditions. See the TAS5630 data manual for a description of these pins.

Table 3. TAS5630 Warning/Error Signal Decoding

\overline{SD}	$\overline{OTW1}$	$\overline{OTW2}$	Device Condition
0	0	0	High-temperature error and/or high-current error
0	0	1	Undervoltage lockout or high current error. 100°C temperature warning.
0	1	1	Undervoltage lockout or high-current error
1	0	0	125°C temperature warning
1	0	1	100°C temperature warning
1	1	1	Normal operation, no errors/warnings

The shutdown signals together with the temperature warning signal give chip-state information as described in the [Table 3](#). device fault-reporting outputs are open-drain outputs.

4 TAS5630DKD2EVM Performance

Table 4. General Test Conditions

General Test Conditions	Notes
Output stage supply voltage:	50 V Laboratory power supply (EA-PS 7065-10A)
Load impedance:	4 and 8 Ω
Input signal	1 kHz sine
Measurement filters	AES17 and AUX0025
Note: These test conditions are used for all tests, unless otherwise specified.	

Table 5. Electrical Data

Electrical Data	Notes/Conditions	
Output power, 1% THD+N, 4 Ω:	250 W	1 kHz, $T_A = 25^\circ\text{C}$
Output power, 10% THD+N, 4 Ω:	310 W	1 kHz, $T_A = 25^\circ\text{C}$
Output power, 1% THD+N, 8 Ω:	140 W	1 kHz, $T_A = 25^\circ\text{C}$
Output power, 10% THD+N, 8 Ω:	175 W	1 kHz, $T_A = 25^\circ\text{C}$
Maximum peak current:	>16 A	1-kHz burst, 1 Ω, $R_{OC} = 22\text{ k}\Omega$
Output stage efficiency:	>90%	2 x channels, 4 Ω
Damping factor:	27	1 kHz, relative to 4 Ω load
H-Bridge Supply current:	55 mA	1 kHz, input grounded
Idle power consumption:	<3 W	H-Bridge Supply, input grounded

Table 6. Audio Performance

Audio Performance	Notes/Conditions	
THD+N, 4 Ω: 1 W	<0.05%	1 kHz
THD+N, 4 Ω: 10 W	<0.04%	1 kHz
THD+N, 4 Ω: 50 W	<0.02%	1 kHz
THD+N, 4 Ω: 100 W	<0.03%	1 kHz
THD+N, 4 Ω: 200 W	<0.40%	1 kHz
THD+N, 8 Ω: 1 W	<0.04%	1 kHz
THD+N, 8 Ω: 10 W	<0.03%	1 kHz
THD+N, 8 Ω: 50 W	<0.02%	1 kHz
THD+N, 8 Ω: 100 W	<0.10%	1 kHz
Dynamic Range:	>100 dB	Ref: rated power, A-weighted, AES17 filter, 2 ch avg
Noise Voltage:	320 μV_{rms}	A-weighted, AES17 filter
Click/Pop, DC step:	<30 mV	Mute/Unmute, No signal, 4 Ω
Channel Separation:	>89 dB	1 kHz
Frequency Response:	$\pm 0.5\text{ dB}$	100 W / 8 Ω, unclipped

Table 7. Thermal Specification

Thermal Specification**	T_{HEATSINK}^*	Notes/Conditions
Idle, all channels switching	30°C	1 kHz, 15 min, input grounded, $T_A = 25^\circ\text{C}$
2 x 31.3 W, 4 Ω (1/8 power)	45°C	1 kHz, 1 hour, $T_A = 25^\circ\text{C}$
2 x 250 W, 4 Ω	70°C	1 kHz, 5 min, $T_A = 25^\circ\text{C}$

*Measured on surface of heatsink

** During the thermal test the heat sink has been ventilated with a fan (NMB-MAT Type: 2410ML-04W-B50) connected to J22.

Table 8. Physical Specifications

Physical Specifications	Notes/Conditions	
PCB dimensions:	94 x 140 x 55	Width x Length x Height (mm)
Total weight:	400 gr	Components + PCB + Heatsink + Mechanics

Note: All electrical and audio specifications are typical values.

SCHEMATIC DISCLAIMER

The schematic information and materials ("Materials") provided here are provided by Texas Instruments Incorporated ("TI") as a service to its customers and/or suppliers, and may be used for informational purposes only, and only subject to the following terms. By downloading or viewing these Materials, you are signifying your assent to these terms.

- 1.) These evaluation schematics are intended for use for ENGINEERING DEVELOPMENT AND EVALUATION PURPOSES ONLY and are not considered by Texas Instruments to be fit as a basis for establishing production products or systems. This information may be incomplete in several respects, including but not limited to information relating to required design, marketing, and/or manufacturing-related protective considerations and product safety measures typically found in the end-product incorporating the goods.
- 2.) Accordingly, neither TI nor its suppliers warrant the accuracy or completeness of the information, text, graphics, links or other items contained within the Materials. TI may make changes to the Materials, or to the products described therein, at any time without notice. TI makes no commitment to update the Materials.
- 3.) TI assumes no liability for applications assistance, customer product design, software performance, or services that may be described or referenced in the Materials. The user assumes all responsibility and liability for proper and safe design and handling of goods. Accordingly, the user indemnifies TI from all claims arising from its use of the Materials.
- 4.) TI currently deals with various customers for products, and therefore our arrangement with the user will not be exclusive. TI makes no representations regarding the commercial availability of non-TI components that may be referenced in the Materials.
- 5.) No license is granted under any patent right or other intellectual property right of TI covering or relating to any combination, machine, or process in which such TI products or services might be or are used. Except as expressly provided herein, TI and its suppliers do not grant any express or implied right to you under any patents, copyrights, trademarks, or trade secret information.
- 6.) Performance tests and ratings, to the extent referenced in the Materials, are measured using specific computer systems and/or components and reflect the approximate performance of TI products as measured by those tests. Any difference in system hardware or software design or configuration may affect actual performance. Buyers should consult other sources of information to evaluate the performance of systems or components they are considering purchasing.
- 7.) Resale of TI's products or services with statements different from or beyond the parameters stated by TI for that product or service in official TI data books or data sheets voids all express and any implied warranties for the associated TI product or service, and is an unfair and deceptive business practice, and TI is not responsible for any such use.
- 8.) The Materials are copyrighted and any unauthorized use may violate copyright, trademark, and other laws. You may only download one copy for your internal use only, unless you are specifically licensed to do otherwise by TI in writing. This is a license, not a transfer of title, and is subject to the following restrictions: You may not: (a) modify the Materials (including any associated warranties, conditions, limitations or notices) or use them for any commercial purpose, or any public display, performance, sale or rental; (b) decompile, reverse engineer, or disassemble software Materials except and only to the extent permitted by applicable law; (c) remove any copyright or other proprietary notices from the Materials; (d) transfer the Materials to another person. You agree to prevent any unauthorized copying of the Materials. TI may terminate this license at any time if you are in breach of the terms of this Agreement. Upon termination, you will immediately destroy the Materials.
- 9.) PCB SPECIFICATION

Version 3.00

BOARD IDENTIFICATION:	A846-PCB-001(3.00)
BOARD TYPE:	DOUBLE-SIDED PLATED-THROUGH BOARD
LAMINATE TYPE:	FR4
LAMINATE THICKNESS:	1.6mm
TOP LAYER COPPER THICKNESS:	70µm (INCL. PLATING EXTERIOR LAYER)
BOTTOM LAYER COPPER THICKNESS:	70µm (INCL. PLATING EXTERIOR LAYER)
COPPER PLATING OF HOLES:	>25µm
MINIMUM HOLE DIAMETER	0.3 mm
SILKSCREEN COMPONENT SIDE:	WHITE - REMOVE SILKSCREEN FROM SOLDER AREA & PRE-TINNED AREAS
SILKSCREEN SOLDER SIDE:	None
SOLDER MASK COMPONENT SIDE:	GREEN
SOLDER MASK SOLDER SIDE:	GREEN
PROTECTIVE COATING:	SOLDER COATING AND CHEMICAL SILVER ON FREE COPPER
ELECTRICAL TEST:	PCB MUST BE ELECTRICAL TESTED
MANUFACTURED TO:	PERFAG 2E (www.perfag.dk)
APERTURE TABLE:	PERFAG 10A (www.perfag.dk)
BOARD SIZE:	95 x 140 mm
Aprox. Number of holes	410
COMMENTS:	SEE DRILL INFORMATION FILE (A846-PCB-001(3.00).pdf)

TIC-HSINK-061 (2.00)

Heat sink for 1 DKD44 package

8.July 2008
TIC-HSINK-061 (2.00).dwg

Jonas L. Holm

APPROX. SCALE: 1.25:1

DIMENSIONS: mm

MATERIAL: Profile TIC-HSINK-050(1.00), ALUMINUM

SURFACE: FREE OF SHARP EDGES

SURFACE TREATMENT: BLACK ANODIZED

TOLERANCES: +/- 0.1 mm

EVALUATION BOARD/KIT IMPORTANT NOTICE

Texas Instruments (TI) provides the enclosed product(s) under the following conditions:

This evaluation board/kit is intended for use for **ENGINEERING DEVELOPMENT, DEMONSTRATION, OR EVALUATION PURPOSES ONLY** and is not considered by TI to be a finished end-product fit for general consumer use. Persons handling the product(s) must have electronics training and observe good engineering practice standards. As such, the goods being provided are not intended to be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including product safety and environmental measures typically found in end products that incorporate such semiconductor components or circuit boards. This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and therefore may not meet the technical requirements of these directives or other related directives.

Should this evaluation board/kit not meet the specifications indicated in the User's Guide, the board/kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user indemnifies TI from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge.

EXCEPT TO THE EXTENT OF THE INDEMNITY SET FORTH ABOVE, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

TI currently deals with a variety of customers for products, and therefore our arrangement with the user **is not exclusive.**

TI assumes **no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein.**

Please read the User's Guide and, specifically, the Warnings and Restrictions notice in the User's Guide prior to handling the product. This notice contains important safety information about temperatures and voltages. For additional information on TI's environmental and/or safety programs, please contact the TI application engineer or visit www.ti.com/esh.

No license is granted under any patent right or other intellectual property right of TI covering or relating to any machine, process, or combination in which such TI products or services might be or are used.

FCC Warning

This evaluation board/kit is intended for use for **ENGINEERING DEVELOPMENT, DEMONSTRATION, OR EVALUATION PURPOSES ONLY** and is not considered by TI to be a finished end-product fit for general consumer use. It generates, uses, and can radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment in other environments may cause interference with radio communications, in which case the user at his own expense will be required to take whatever measures may be required to correct this interference.

EVM WARNINGS AND RESTRICTIONS

It is important to operate this EVM within the power supply voltage range of 0 V to 50 V.

Exceeding the specified input range may cause unexpected operation and/or irreversible damage to the EVM. If there are questions concerning the input range, please contact a TI field representative prior to connecting the input power.

Applying loads outside of the specified output range may result in unintended operation and/or possible permanent damage to the EVM. Please consult the EVM User's Guide prior to connecting any load to the EVM output. If there is uncertainty as to the load specification, please contact a TI field representative.

During normal operation, some circuit components may have case temperatures greater than 90°C. The EVM is designed to operate properly with certain components above 125°C as long as the input and output ranges are maintained. These components include but are not limited to linear regulators, switching transistors, pass transistors, and current sense resistors. These types of devices can be identified using the EVM schematic located in the EVM User's Guide. When placing measurement probes near these devices during operation, please be aware that these devices may be very warm to the touch.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
