ePower-Lite Connector

ePower-Lite is a plastic power connector series designed to be used in the hybrid electric vehicle and heavy equipment markets. The 2-pole, 3-pole and 4-pole connectors incorporate patented RADSOK® technology which provides higher amperage, lower T-rise and voltage drop, and less resistance. RADSOK's twisted grid configuration allows for up to 50% more current to pass through the same size pin, while providing increased reliability and cycle durability, as well as lower mating forces.

The compact plastic shell structure is light weight with a small footprint. There is a 3.6mm and 5.7mm version which can carry current up to 70A to 120A, field installable and repairable. We also offer a low cost alternative as our ePower-Lite Mini version which is a fit for low speed markets and low cost requirements. These attributes make the ePower-Lite robust and the interconnect of choice for the EV and Fuel Cell Vehicle markets.
