1

Slide onto the cable the heatshrink sleeve and the ferrule
Strip the cable.
Cut the foil under the braid for the FILECA cable.
Optionally, to facilitate the stripping of the inner cable, the length "a" could be stripped after crimping of the ferrule.

2

Slide the clamp nut onto the crimp sleeve.
Slide sub-assembly under the braid.
Slide ferrule over the braid against clamp nut. (In direction F)
Crimp the ferrule with crimping tool + dies

3

The dielectric must be in the same plane as the face of the crimp sleeve. Cut the dielectric flush to crimp sleeve if it exceeds.
Clean the dielectric side.
Mount insulator against crimp sleeve.

4

Slide the center contact onto the cable inner conductor against insulator.
Crimp the center contact with the crimping tool and the positioner.

5

Screw sub-assembly into the connector body. (recommended coupling see the connector TDS)
Slide sleeve heatshrink over ferrule and put in the place as below
