

Micro Metal Gearmotor to LEGO® Axle Adaptor (pack of 4)

PIM132

This little dingus connects our popular micro metal gearmotors to a standard LEGO® axle - ideal for making your brick creations move autonomously!

Injection moulded from snazzy purple plastic they are made in the UK. Super-handly and durable for all sorts of projects - we've not managed to wear one out yet!

Each pack contains four adaptors - you just bring the LEGO® and gearmotors!
