Sensata Technologies

| DRC SERIES
DIN RAIL MOUNT

DRC3R48D420

Features

- 7.6 Amp AC Semiconductor Motor Controller
- Load voltage range up to 600 VAC
- Fits standard 35mm DIN Rail
- LED input status indicator
- AC or DC control
- Zero Voltage (resistive loads) or instantaneous (inductive loads) turn-on output
- C-UL-US Listed, CCC Certified, IEC Rated, CE & RoHS Compliant, Horse-power Rated
- Built-in Overvoltage Protection
- Ultra-efficient thermal management design (Patented)

Motion Control

Start / Stop   Reversing

Introduction

Solicon DRC3 Series are Solid State Contactors intended for frequently switching on and off three phase loads up to **5 HP, 600 VAC 7.6 Amps.** They are available in both contactor versions **DRC3P** and reversing contactor versions **DRC3R.**

The Solicon Contactor DRC3P is available in either instantaneous turn-on (for Motor Control) or zero voltage turn-on (for Resistive Loads). It is available in either 2 or 3 controlled leg versions. The 2 legs control version is particularly suitable for motor control circuits where the neutral conductor is not utilized.

The Solicon Reversing Contactor DRC3R includes an **interlock** control that allows only off, forward and reverse operation in a safe mode while providing high space saving; it switches instantaneously upon application of the control voltage unless an instantaneous change of direction is commanded, then it will delay the direction change by 100msec in order to prevent simultaneous forward and reverse operations.

All the models of Solicon DRC3 Series combine the benefits and advantages of a solid state contactor with the functionality and simplicity of use of an electromechanical contactor thanks to the proprietary **thermal management technology (Patented)** and complete electrical insulation (no grounding required); the **embedded auxiliary contacts,** normally open and/or normally closed, are intended to be used at 18-280VAC. Five different control voltages are available in order to cover most applications. All models include **overvoltage protection**.

Series
DRC

Function
3P: Contactor
3R: Reversing Contactor

Operating Voltage
40: 400 VAC *(3R function only)*
48: 480 VAC
60: 600 VAC *(3P function only)*

Control Voltage
A: 208-265 VAC
B: 90-140 VAC
C: 36-55 VAC/DC
D: 18-30 VAC/DC *(3P function only)*
    18-30 VAC *(3R function only)*
E: 18-30 VDC *(3R function only)*

Load Current per Phase
4: 7.6 Amp FLA *(x2 Controlled Legs & 3R function)*;
    4.8 Amp FLA *(x3 Controlled Legs only)*

Auxiliary Contacts
N.O. - N.C.
00: Not included
11: 1 Solid State Auxiliary Contact, Normally Open;
    1 Solid State Auxiliary Contact, Normally Closed *(3P function only)*
20: 2 Solid State Auxiliary Contacts, Normally Open

Switching Mode
(3P function only)
Blank: Zero Voltage Turn-On
R: Instantaneous Turn-On

Controlled Legs
(3P function only)
Blank: 3 Controlled Legs
2: 2 Controlled Legs

— Required for valid part number
☐ For options only and not required for valid part number

⬤ GENERAL SPECIFICATIONS [(1)]

Description	Parameters
Dielectric Strength, Input/Output/Base (50/60Hz) [(10)]	3750 Vrms
Minimum Insulation Resistance (@ 500 VDC)	10^9 Ohms
Maximum Capacitance, Input/Output	20 pF
Ambient Operating Temperature Range [(11)]	-30 to 80 °C
Ambient Storage Temperature Range	-40 to 100 °C
Weight (typical)	2 Controlled Legs (6.9 oz [197 g]) / 3 Controlled Legs (8.0 oz [228 g])
Housing Material	UL94 V-0
Housing Color	Black and Light Gray
LED Status Indicator (color) [(12)]	Forward (Green) / Reverse (Amber)
Short Circuit Current Rating [(13)]	100kA
MTBF (Mean Time Between Failures) at 40°C ambient temperature [(14)]	1,398,000 hours (159 years)
MTBF (Mean Time Between Failures) at 60°C ambient temperature [(14)]	390,000 hours (44 years)
Pollution Degree	2
Protection Degree [(15)]	IP20
Humidity	85% non-condensing
Control and Auxiliary Contact Terminal Screw Torque Range (in-lb/Nm)	12 / 1.36
Load Terminal Screw Torque Range (in-lb/Nm)	15 / 1.7
Input Terminal Wire Capacity	18-12 AWG (IEC 1-4 mm²) (stranded /solid)
Output Terminal Wire Capacity	18-10 AWG (IEC 1-6 mm²) (stranded /solid)

(Conforming to the IEC60947-4-2 and UL508)

IEC standard 60947-4-1 make a distinction between two different types of protection, (called "coordination"), which are designated types "1" and "2".
Any short-circuit that occurs is cleared safely by either type of coordination.
The only difference between the 2 categories concerns the extent of the SSR damage caused by the short-circuit.

Type "1" coordination requires that in the event of a short-circuit, the Solid State Contactor does not endanger personnel or installations,
but permanent damage to the SSC is permissible. In this case the SSC may need to be replaced. For this type of co-ordination,
the use of fusing or circuit breakers adequate to protect the system and wiring from short circuits, (but not specifically considering SSC protection), can be used.

Type "2" coordination requires that under a short-circuit condition, the circuit is interrupted, the SSC does not endanger persons or installations,
and in addition the SSR will be able to operate after the fault condition is repaired.

Type of coordination 1

ACCESSORIES

ID Marker Strips

CNLB, CNLN, CNL2

Packages of 10 plastic strips comprising 10 individual markers which can be placed for easy identification during the use of multiple units.

Blank Strips
Part no.: CNLB

Numbered 1 to 10 Strips
Part no.: CNLN

Numbered 11 to 20 Strips
Part no.: CNL2

⬤ GENERAL NOTES

(1) All parameters at 25°C unless otherwise specified.
(2) For DRC3P relay will self trigger between 900-1200V, Not suitable for capacitive loads.
(3) For DRC3R over rated voltage internal self protection will be activated increasing leakage current.
(4) Mounted in the Vertical position.
(5) On DRC3R models the range for option D is 18-30 VAC.
(6) For low temperature operation consider nominal control voltage.
(7) For DRC3R the turn-on time is 100msec ± 30msec.
(8) When is complete removed the control signal. For DRC3R the turn-off time is 20msec.
(9) Operating voltage range 18-30 VDC is also valid when used to latch the DRC contactor control input.
(10) For input to auxiliary output the dielectric strength is 2.5kV.
(11) UL approval up to 40°C surrounding temperature.
(12) Reverse Amber Indicator is for DRC3R models only.
(13) 100kA, 480VAC, when protected with CC class fuses rated 600VAC, 20 A or equivalent.
(14) All parameters at 50% power rating and 100% duty cycle (contact Crydom tech support for detailed report).
(15) IP20 rating is not associated with the UL approval.
(16) Derate information is valid when DCR contactors are used with or without accessories, installed on top and/or bottom.
(17) Minimum spacing to obtain max. current is 22mm between adjacent units.
(18) Combinations of these Protective Devices and Solid State Contactor have not been evaluated by UL.
(19) For DRC3P models external loads can be connected in parallel to the control input.
(20) DRC3R internal safety interlock circuit prevents the product to work if any leakage current is present in the control input currently not enabled.

⬤ WARNINGS

DANGER

RISK OF MATERIAL DAMAGE AND HOT ENCLOSURE
• The product's side panels may be hot, allow the product to cool before touching
• Follow proper mounting instructions including torque values
• Do not allow liquids or foreign objects to enter this product
Failure to follow these instructions can result in serious injury, or equipment damage.

⚡ Danger Electric shock risk

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH
• Disconnect all power before installing or working with this equipment
• Verify all connections and replace all covers before turning on power
Failure to follow these instructions will result in death or serious injury
