## **SIEMENS**

Data sheet US2:17EUE92BC12

Non-reversing motor starter Size 1 3/4 Three phase full voltage Solid-state overload relay OLRelay amp range 10-40a 220-240/440-480VAC 60HZ coil Combination type 60Amp fusible disconnect 60Amp / 250V fuse clip Enclosure NEMA type 1 Indoor general purpose use Standard width enclosure

product brand name	Class 17	
design of the product	Non-reversing motor starter with fusible disconnect	
special product feature	ESP200 overload relay; Half-size controller; Dual voltage coil	
General technical data		
weight [lb]	34 lb	
Height x Width x Depth [in]	24 × 11 × 8 in	
touch protection against electrical shock	NA for enclosed products	
installation altitude [ft] at height above sea level maximum	6560 ft	
ambient temperature [°F]		
<ul><li>during storage</li></ul>	-22 +149 °F	
during operation	-4 +104 °F	
ambient temperature		
<ul><li>during storage</li></ul>	-30 +65 °C	
during operation	-20 +40 °C	
country of origin	USA	
Horsepower ratings		
yielded mechanical performance [hp] for 3-phase AC motor		
• at 200/208 V rated value	10 hp	
• at 220/230 V rated value	10 hp	
• at 460/480 V rated value	0 hp	
● at 575/600 V rated value	0 hp	
Contactor		
size of contactor	Controller half size 1 3/4	
number of NO contacts for main contacts	3	
operating voltage for main current circuit at AC at 60 Hz maximum	600 V	
operational current at AC at 600 V rated value	40 A	
mechanical service life (operating cycles) of the main contacts typical	1000000	
Auxiliary contact		
number of NC contacts at contactor for auxiliary contacts	0	
number of NO contacts at contactor for auxiliary contacts	1	
number of total auxiliary contacts maximum	8	
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)	
Coil		
type of voltage of the control supply voltage	AC	
control supply voltage		
at AC at 60 Hz rated value	220 480 V	
holding power at AC minimum	8.6 W	
apparent pick-up power of magnet coil at AC	218 VA	
apparent holding power of magnet coil at AC	25 VA	

1, 1, 2, 3, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1,	85 1.1
magnet coil	
percental drop-out voltage of magnet coil related to the input voltage	96
ON-delay time 19	) 29 ms
OFF-delay time 10	) 24 ms
Overload relay	
product function	
overload protection     Ye	es
• phase failure detection Ye	es
asymmetry detection     Ye	es ·
ground fault detection     Ye	es ·
• test function Ye	es ·
• external reset Ye	es
reset function Ma	anual, automatic and remote
trip class CL	ASS 5 / 10 / 20 (factory set) / 30
	) 40 A
tripping time at phase-loss maximum 3 s	S
relative repeat accuracy	
product feature protective coating on printed-circuit board Ye	es
number of NC contacts of auxiliary contacts of overload relay 1	
number of NO contacts of auxiliary contacts of overload relay	
operational current of auxiliary contacts of overload relay	
• at AC at 600 V	A
• at DC at 250 V	
	A@600VAC (B600), 1A@250VDC (R300)
insulation voltage (Ui)	
	00 V
3 - p	0 V
Disconnect Switch	
	A / 250V
	ass R fuse clips
	ass R
Enclosure	
	doors, usable on a general basis
Mounting/wiring	
mounting position vel	
fastening method Su	rtical
	rtical urface mounting and installation
type of electrical connection for supply voltage line-side Bo	urface mounting and installation
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply 35	urface mounting and installation ox lug
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  35  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded	urface mounting and installation ox lug i 35 lbf·in
type of electrical connection for supply voltage line-side  tightening torque [lbf·in] for supply  35  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  75	urface mounting and installation ox lug 5 35 lbf·in 2 (14 2 AWG)
type of electrical connection for supply voltage line-side  tightening torque [lbf·in] for supply  35  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible 75  material of the conductor for supply  AL	urface mounting and installation  ox lug  i 35 lbf-in  i (14 2 AWG)
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply 35 type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder Sc	urface mounting and installation  ox lug  i 35 lbf-in  i (14 2 AWG)  i °C  or CU
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply 35 type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder 45	urface mounting and installation  ox lug  i 35 lbf-in  i. (14 2 AWG)  i. °C  or CU  crew-type terminals
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply 35 type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded	urface mounting and installation  ox lug  5 35 lbf·in  c (14 2 AWG)  5 °C  L or CU  crew-type terminals  5 45 lbf·in
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  material of the conductor for supply  type of electrical connection for load-side outgoing feeder  tightening torque [lbf-in] for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder in load-side outgoing feeder  temperature of the conductor for load-side outgoing feeder  temperature of the conductor for load-side outgoing feeder  maximum permissible	arface mounting and installation  bx lug  5 35 lbf-in  6 (14 2 AWG)  5 °C  L or CU  crew-type terminals  5 45 lbf-in  6 (14 2 AWG)
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder AL	urface mounting and installation  ox lug  5 35 lbf-in  2 (14 2 AWG)  5 °C  L or CU  brew-type terminals  5 45 lbf-in  2 (14 2 AWG)
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder and temperature of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of magnet coil	arface mounting and installation  ax lug  5 35 lbf-in  c (14 2 AWG)  5 °C  a or CU  brew-type terminals  5 45 lbf-in  c (14 2 AWG)  5 °C  L or CU
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  material of the conductor for supply  type of electrical connection for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder  temperature of the conductor for load-side outgoing feeder  maximum permissible  material of the conductor for load-side outgoing feeder  type of electrical connection of magnet coil  sc  tightening torque [lbf-in] at magnet coil  5.	arface mounting and installation  ax lug  a 35 lbf-in  a. (14 2 AWG)  b. or CU  crew-type terminals  a 45 lbf-in  a. (14 2 AWG)  b. or CU  crew-type terminals  c. or CU  crew-type terminals  c. or CU  crew-type terminals
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  material of the conductor for supply  type of electrical connection for load-side outgoing feeder  tightening torque [lbf-in] for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder imaximum permissible  material of the conductor for load-side outgoing feeder  type of electrical connection of magnet coil  type of electrical connection of magnet coil  type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded	arface mounting and installation  ax lug  a 35 lbf-in  a. (14 2 AWG)  a. °C  a or CU  brew-type terminals  a 45 lbf-in  a. (14 2 AWG)  a. °C  b. or CU  crew-type terminals  a 12 lbf-in
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  material of the conductor for supply  type of electrical connection for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder as for load-side outgoing feeder  temperature of the conductor for load-side outgoing feeder  temperature of the conductor for load-side outgoing feeder  maximum permissible  material of the conductor for load-side outgoing feeder  type of electrical connection of magnet coil  scitightening torque [lbf-in] at magnet coil  type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded  temperature of the conductor at magnet coil maximum  75	arface mounting and installation  ax lug  a 35 lbf-in  a. (14 2 AWG)  b. or CU  crew-type terminals  a 45 lbf-in  a. (14 2 AWG)  b. or CU  crew-type terminals  a 45 lbf-in  a 12 lbf-in  crew-type terminals  a 12 lbf-in  a 12 lbf-in  a 12 AWG)
type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply maximum permissible type of electrical connection for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of magnet coil solution torque [lbf-in] at magnet coil type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded temperature of the conductor at magnet coil maximum permissible material of the conductor at magnet coil maximum permissible material of the conductor at magnet coil maximum permissible material of the conductor at magnet coil columns and the conductor at magnet coil maximum permissible	arface mounting and installation  ax lug  a 35 lbf-in  a (14 2 AWG)  a or CU  brew-type terminals  a 45 lbf-in  a (14 2 AWG)  a or CU  crew-type terminals  a 45 lbf-in  a (14 2 AWG)  a or CU  crew-type terminals  a 12 lbf-in  a (16 12 AWG)  a or C
type of electrical connection for supply voltage line-side  tightening torque [lbf-in] for supply  type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded  temperature of the conductor for supply maximum permissible  material of the conductor for supply maximum permissible  type of electrical connection for load-side outgoing feeder  type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded  temperature of the conductor for load-side outgoing feeder  maximum permissible  material of the conductor for load-side outgoing feeder  type of electrical connection of magnet coil  type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded  temperature of the conductor cross-sections of magnet coil for AWG cables single or multi-stranded  temperature of the conductor at magnet coil maximum permissible  material of the conductor at magnet coil maximum permissible  material of the conductor at magnet coil column aximum permissible  material of the conductor at magnet coil column aximum permissible  material of the conductor at magnet coil column aximum permissible  material of the conductor at magnet coil column aximum permissible  material of the conductor at magnet coil column aximum permissible  material of the conductor at magnet coil column aximum permissible	arface mounting and installation  ax lug  5 35 lbf-in  6 (14 2 AWG)  5 °C  L or CU  brew-type terminals  6 45 lbf-in  6 (14 2 AWG)  5 °C  L or CU  brew-type terminals  6 45 lbf-in  6 (16 12 bf-in  6 (16 12 AWG)  6 °C

AWG cables for auxiliary contacts single or multi-stranded		
temperature of the conductor at contactor for auxiliary contacts maximum permissible	75 °C	
material of the conductor at contactor for auxiliary contacts	CU	
type of electrical connection at overload relay for auxiliary contacts	Screw-type terminals	
tightening torque [lbf-in] at overload relay for auxiliary contacts	7 10 lbf·in	
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2x (20 14 AWG)	
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C	
material of the conductor at overload relay for auxiliary contacts	CU	
Short-circuit current rating		
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)	
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
