

OH-MSP-16-F

Ruland OH-MSP-16-F, 16mm Shaft Collar With OD Holes, Black Oxide Steel, Two-Piece Clamp Style, 34mm OD, 13mm Width

*Additional hardware NOT included

Description

Ruland OH-MSP-16-F is a two-piece shaft collar with a 16mm bore, 34mm OD, and 13mm width. It has OD flats and tapped holes for mounting shaft collars to each other or adjacent components. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. OH-MSP-16-F is commonly used for guiding, spacing, stopping, mounting, and component alignment. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of ? .05mm). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. OH-MSP-16-F is stamped with the Ruland name and bore size for ease of identification. Halves are mated throughout the manufacturing process for proper fit and alignment. Forged screws test beyond DIN 912 12.9 standards to ensure maximum holding power. OH-MSP-16-F is manufactured from solid bar stock sourced from select North American mills and machined to a fine burr free finish. Ruland uses 1215 lead-free steel with a proprietary black oxide finish that produces a fine glossy finish while increasing holding power and resisting corrosion. OH-MSP-16-F is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

Product Specifications

Bore (B)	16 mm	Bore Tolerance	+0.050 mm / +0.012 mm
Outer Diameter (OD)	34 mm	Clearance Diameter (C) MAX	39.3 mm
Width (W)	13 mm	Width Tolerance	+0.076 mm / -0.254 mm
Threaded Mounting Hole	M5	Through to Bore TB	9 mm
Recommended Gap	1.59 mm	Recommended Shaft Tolerance	+0.000 mm / -0.013 mm
Forged Clamp Screw	M5 x 16	Screw Material	Alloy Steel
Hex Wrench Size	4.0 mm	Screw Finish	Black Oxide
Seating Torque	9.5 Nm	Screw Location (R)	12.50 mm
Number of Screws	2 ea	Material Specification	1215 Carbon Steel Bar
Temperature	-40°F to 350°F (-40°C to 176°C)	Finish Specification	Hot Process Black Oxide, Impregnated with Naphthenic Oil, Centrifugally Dried
Manufacturer	Ruland Manufacturing	Country of Origin	USA
Weight (lbs)	0.138800	UPC	634529221518
Tariff Code	8483.60.8000	UNSPC	31162811
Note 1	This product has been discontinued as a standard item. Please inquire for special pricing.		
Prop 65	 WARNING This product can expose you to the chemical Ethylene Thiourea, known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov .		

Installation Instructions

1. Use the OH-MSP-16-F two-piece shaft collar as it is received.
2. Wipe the bore clean.
3. Apply a thin coat of light oil to the shaft.
4. Place the collar onto the desired shaft location and tighten it using a 4.0 mm hex wrench until a slight resistance is felt.
5. Be sure to maintain the gap of 1.59 mm between the two halves of the collar during installation.
6. Wring collar into its final position and tighten the screw to the full recommended seating torque of 9.5 Nm using a 4.0 mm torque wrench.
