

## SPB-5-A

Ruland SPB-5-A, 5/16" Balanced Shaft Collar, Aluminum, Two-Piece Clamp Style, 11/16" OD, 0.281" Width

## **Description**

Ruland SPB-5-A is a two-piece shaft collar with a 0.3125" bore, 11/16" OD, and 0.281" width. It has a balanced design with opposing screws for use in high RPM applications such as those found in motors and gearboxes. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. SPB-5-A is commonly used for guiding, spacing, stopping, mounting, and component alignment. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of ? .002"). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. SPB-5-A is stamped with the Ruland name and bore size for ease of identification. Halves are mated throughout the manufacturing process for proper fit and alignment. Forged screws test beyond ANSI standards to ensure maximum holding power. SPB-5-A is manufactured from solid bar stock sourced from select North American mills and machined to a fine burr free finish. Ruland uses high grade 2024 aluminum for increased screw seating torque. SPB-5-A is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

**Product Specifications** 

Bore (B)	0.3125 in	Bore Tolerance	+0.0020 in / +0.0005 in	
Outer Diameter (OD)	11/16 in	Clearance Diameter (C) MAX	0.838 in	
Width (W)	0.281 in	Width Tolerance	+0.003 in / -0.010 in	
Recommended Gap	0.047 in	Recommended Shaft Tolerance	+0.0000 in / -0.0005 in	
Forged Clamp Screw	#4-40	Screw Material	Alloy Steel	
Hex Wrench Size	3/32 in	Screw Finish	Black Oxide	
Seating Torque	15 lb-in	Screw Location (R)	0.250 in	
Number of Screws	2 ea	Material Specification	2024-T351 Aluminum Bar	
Finish Specification	Bright, No Plating	Manufacturer	Ruland Manufacturing	
Country of Origin	USA	Temperature	-40°F to 225°F (-40°C to 107°C)	
Weight (lbs)	0.008900	UPC	634529215876	
Tariff Code	8483.60.8000	UNSPC	31162811

## Installation Instructions

- 1. Use the SPB-5-A balanced shaft collar as it is received.
- 2. Wipe the bore clean.
- 3. Apply a thin coat of light oil to the shaft.
- 4. Place the collar onto the desired shaft location and tighten it using a 3/32 in hex wrench until a slight resistance is felt.
- 5. Be sure to maintain the gap of 0.047 in between the two halves of the collar during installation.
- 6. Wring collar into its final position and tighten the screw to the full recommended seating torque of 15 lb-in using a 3/32 in torque wrench.
