

## Features

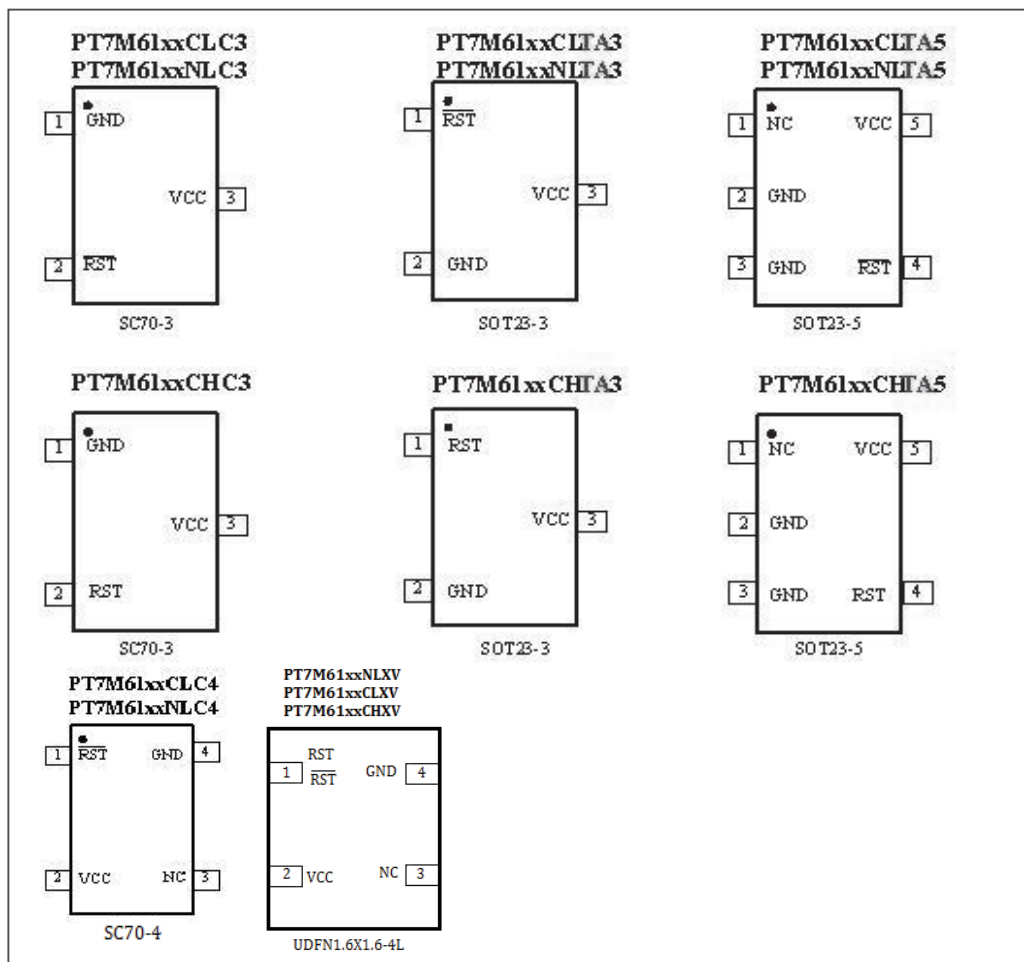

- Highly accurate:  $\pm 1.5\%$  ( $25^{\circ}\text{C}$ )
- Low power consumption:  $1\mu\text{A}$  @  $3.6\text{V}$   $V_{\text{CC}}$
- Detect voltage range: 1.8 to 5V in 100mV increments
- Operating voltage range: 1.2V ~ 5.5V
- Operating temperature range:  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$
- Detect voltage accuracy over temperature:  $\pm 2.5\% \times \text{Typ}$
- Output configuration: N-channel open drain or CMOS

## Description

The PT7M61xx series of ultra-low-power voltage detectors monitor battery, power-supply and system voltages. Each circuit includes a precision bandgap reference, a comparator, internally trimmed resistor networks that set specified trip thresholds, and an internal 1% and 5% threshold hysteresis circuit. Output is asserted when  $V_{\text{CC}}$  falls below the internal  $V_{\text{TH}}$  and remains asserted until  $V_{\text{CC}}$  rises above  $V_{\text{TH+}}$  ( $V_{\text{TH+}} = V_{\text{TH}} \times 1.05$ ). These devices provide excellent circuit reliability and low cost by eliminating external components and adjustments when monitoring nominal system voltages from +1.8V to +5V in 100mV increments. The series are voltage detectors with a propagation delay of 17 $\mu\text{s}$ .

The family is available with three output stage options: push-pull with active-low output, push-pull with active-high output, and open drain with active-low output. These devices specified over the  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$  temperature range.

## Pin Configuration

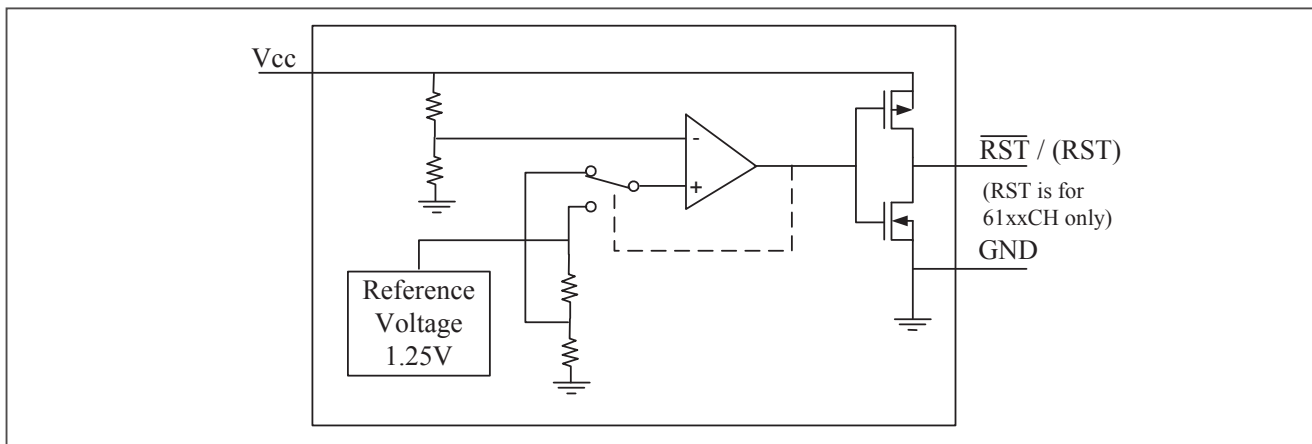

## Pin Description

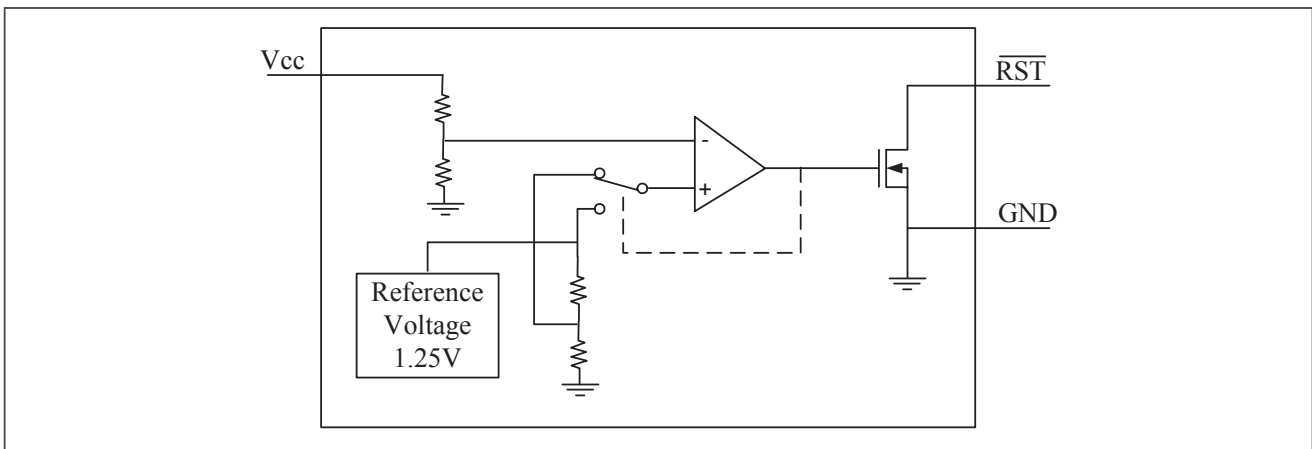

Name	Type	Description
$\overline{\text{RST}}$	O	<b>Reset Output (PT7M61xxCL/NL):</b> $\overline{\text{RST}}$ is asserted when $V_{CC}$ drops below voltage threshold $V_{TH}$ . Active low.
RST	O	<b>Reset Output (PT7M61xxCH):</b> RST is asserted when $V_{CC}$ drops below voltage threshold $V_{TH}$ . Active high.
GND	P	<b>Ground</b>
$V_{CC}$	P	<b>Supply Voltage.</b>

## Maximum Ratings

Storage Temperature .....	-65°C to +150°C
Ambient Temperature with Power Applied.....	-40°C to +85°C
Supply Voltage to Ground Potential (V <sub>CC</sub> to GND) .....	-0.3V to +6.0V
DC Input Voltage (All inputs except V <sub>CC</sub> and GND).....	-0.3V to V <sub>CC</sub> +0.3V
DC Output Current (All outputs) .....	20mA
Power Dissipation .....	320mW (Depend on package)

**Note:**

Stresses greater than those listed under MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

## Typical Operation Circuit

### PT7M61xxNL Application Example

Please use N-ch open drains configuration, when a resistor  $R_{IN}$  is connected between the  $V_{CC}$  pin and power source  $V_{IN}$ . In such cases, please ensure that  $R_{IN}$  is less than  $10k\Omega$  and that  $C$  is more than  $0.1\mu F$ .  $R_L$  could be  $1k\Omega$  to  $510k\Omega$ .

**LIFE SUPPORT**

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
