3M™ Hand Masker™ Paper Blade PB9, 9 in

3M™ Hand Masker™ Tack Down Tape Dispenser TDTD

Product Description

The 3M™ Hand Masker™ Kit M3000KML is a hand-held, lightweight dispenser that provides complete surface protection in less time by allowing one person to apply both tape and film/plastic/paper in one easy step. The M3000 dispenses Hand-Masker Pre-folded Masking Film+ (up to 144"), Hand-Masker Contractor's Plastic (up to 12'), or Hand-Masker Masking Paper (up to 18") and Scotch® masking tapes (3/4" to 2"). Accessories include a paper blade, film blade, multi-purpose hook and a tack down tape dispenser. This dispenser can save time when preparing for painting, exterior wall finishing, drywall texturing, and floor sanding jobs.

Note: It is recommended to use Scotch-Blue™ Painter's Tape for Multi-Surfaces or Scotch® Brand masking tapes since they have a smooth, consistent unwind. Applicator does not work well with thin, paper-backed masking tapes.

I like that this product is sturdy and well made. I do not understand why 3M sell this masker
then make you order the paper blade separately. This is a must have piece and should be
included with the unit.

Submitted on 9/17/11 | By dean

Had a two story paint job off a ladder so I purchased one with film from the Home Depot ...
the curtain thing is slick but I could not work the blade properly, it just shredded most of the
time. Sometimes it worked though and that was cool. Used scissors in the end . Still a sound
purchase though. 3M should add a little zip blade of some sort .... mmm, I'm on to
something ...
