Concept of operation

KTS Core Easy Teach - Setting the switching threshold

Suitable for manual positioning of the object to be detected, e.g. marks and background.

1. Position mark

When setting the contrasts to be detected, the first LED (green) flashes in the bar graph. Press Teach-in pushbutton.

2. Position background

When setting the contrasts to be detected, the second LED (green) flashes in the bar graph. Press Teach-in pushbutton.

Example

Switching characteristics

The optimum emitted light is selected automatically (at RGB variants).

Static teach-in: light/dark setting is defined using teach-in sequence.

Keylock (activation and deactivation): Press and hold the Teach-in pushbutton > 10 s.

Teach-in failure: The Q-LED (yellow) flashes and all LEDs flash on the bar graph (green).

KTS Core - setting the switching threshold (2-point teach-in)

Suitable for manual positioning of the object to be detected, e.g. marks and background.

1. Position mark

2. Position background

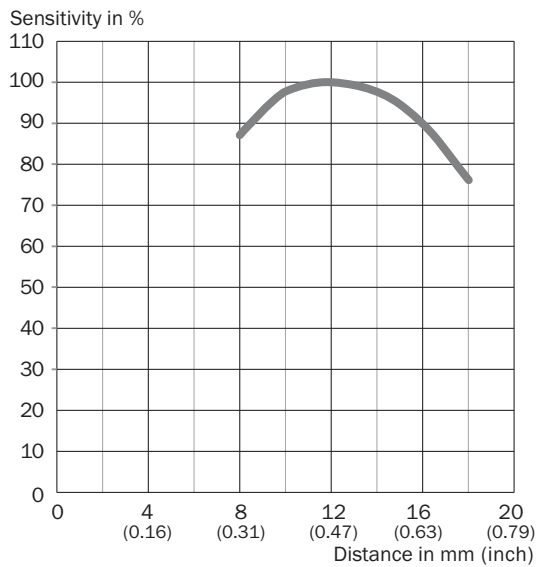

When setting the contrasts to be detected, the first LED (green) flashes in the bar graph. Press set button.

When setting the contrasts to be detected, the second LED (green) flashes in the bar graph. Press set button. The Quality of Teach is displayed.
