Opti-Core™ Fiber Optic Indoor/Outdoor All-Dielectric Cable with Tight Buffered Fibers - Americas

PANDUIT®

technical information

Panduit® Opti-Core® Indoor/Outdoor All-Dielectric Cable with tight buffered fibers are an integral part of the Panduit end-to-end fiber optic solution, designed to support today's data needs while meeting tomorrow's ever-advancing network requirements. This cable provides water blocking technology, high density, and easy installation in transitional aerial and duct applications and entrance facilities, and the 900µm tight-buffered fibers provides easy connectorization. The tight-buffered fibers surrounded by aramid yarn strength members combine usability indoors and out. Cables with greater than 24 fibers feature a sub-unit design that simplifies fiber identification, provides easy access and routing of the fibers. It also increases cable durability with a dielectric central strength member. Opti-Core® Fiber Optic Indoor/Outdoor Riser (OFNR) and Plenum (OFNP) Rated All-Dielectric Cable with tight buffered fibers are tested in accordance with Telcordia GR-20, Issue 2, GR-409 and with relevant EIA/TIA-455 series FOTPs for fiber optic cable. All multimode and singlemode cable is available in 2, 4, 6, 8, 12, and 24-fiber counts as a "non-subunitized" design and in 36, 48, 72, and 96-fiber counts (144 for Riser) as a "sub-unitized" design. All Opti-Core® fiber cable is RoHS compliant.

application

These cables provide an effective solution for inter-building and building transition applications utilizing field installable connectors. This cable is available in both riser rated and plenum rated version for deployment in any inside plant fire-code application. The UV-resistant outer jacket, coupled with dry water-blocking technology, address environmental concerns for outdoor use.
