

EPC175 Particle Counter/Air Quality Meter

Displays Particle Count (PM2.5/PM10), Air Temperature, Relative Humidity, Formaldehyde (HCHO) and TVOCs

Features:

- 3" Color TFT display with 5 brightness levels
- Memory stores 5000 data sets (PM2.5, PM10, date and time) and can be displayed as historical data curves
- PM2.5 programmable alarm with 5 selectable levels (10, 35, 75, 150, 200 mg/m³)
- Programmable auto power off/auto sleep with disable
- Auto sleep turns off the display but measurement still continues
- Includes (1) Li-ion battery, AC Adapter and USB power/charging cable

Applications:

Particle Counters are typically used for IAQ (indoor air quality) testing. They work by counting and sizing the number of particles in the air. This can help determine the air quality level in a building or industrial work environment. Industries include semi-conductors, pharmaceuticals, data centers, optics, aerospace, cleanrooms, operating rooms and other sensitive applications.
