

## Precision Fixturing and Toe Clamp Set

This set of fixturing accessories provides rigid, consistent workholding without the use of tape or glue. The Tall Alignment Bracket is precision-machined from aluminum and bolts into the machine's T-slot bed. The Toe Clamps slide into the T-slots and are tightened with hex keys to clamp your material. Easily fixture and remove materials with a simple turn of the hex key.

**Note:** as these accessories require the use of a T-slot bed, they are not compatible with the Kickstarter Othermill.
