

## TCM 300 / TCM 320 (868 MHz), TCM 300U / TCM 320U (902 MHz) Transceiver Modules

The transceiver modules **TCM 300** and **TCM 320** enable the realization of highly efficient radio actors, repeaters and other line powered applications for the EnOcean systems with 868 MHz & 902 MHz.

The module provides several built-in operating modes. In addition repeater functionality (1 or 2 level) can be activated. Using the Dolphin API library it is possible to write custom specific software for the module. The modules are in-system programmable.

### Built-in operating modes

- Unidirectional serial communication (ESP2)
- Bidirectional serial communication (ESP2)
- 1-channel relay mode
- 4-channel relay mode
- 1-channel dimming mode

### Features accessible via API:

- Integrated 16 MHz 8051 CPU with 32 kB FLASH and 2kB SRAM
- Various power down and sleep modes down to 0.2  $\mu$ A current consumption
- Up to 14 configurable I/Os
- 10 bit ADC, 8 bit DAC
