Micro Air Filter

Model FL0030

Hollow Fiber Micro Filter
For IN6430

Micro Filtration for Compressed Air and Gases

Features

- 0.01µm Hollow Fiber Micro Filter, and High Flow Rate
- Excellent Particle Removal Efficiency
- Compact and Light Weight
- Quick and Convenient Filter Change
- Precision Cleaned and Packaged

Applications

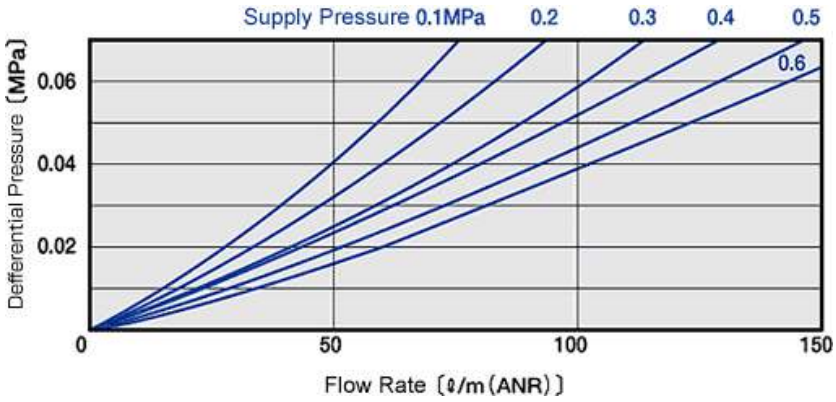
- Precision Measuring Instruments and Analysis Equipment, Semiconductor Manufacturing Equipment
- Printing, Painting Equipment, Machine Tools
- Medical, Dental and Food Processing Equipment

Clean Performance

The FM0030 micro filter features a hollow fiber membrane that provides excellent filtration and has a long service life. The compact design is easy to install and comes with quick release connections for fast replacement. All materials used are compatible for the most stringent applications.

Yearly minimum replacement. More often if used in a controlled or dirty environment.

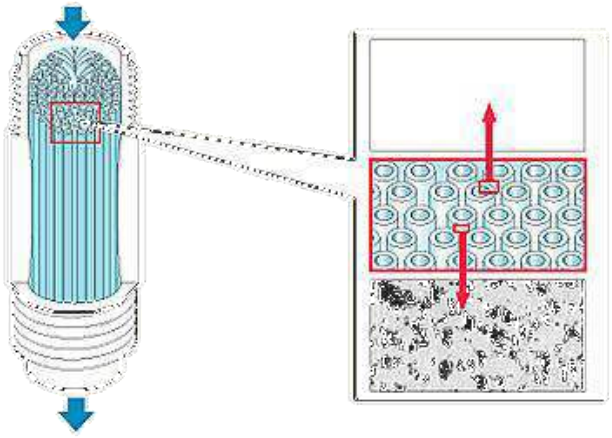
Flow Characteristics



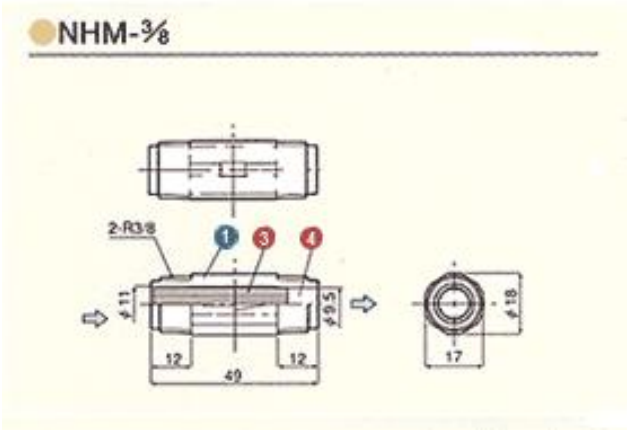
Features

- 0.01µm Hollow Fiber Micro Filter, and High Flow Rate
- Excellent Particle Removal Efficiency
- Compact and Light Weight
- Quick and Convenient Filter Change
- Precision Cleaned Product (double packing)

Exchange Filter Hollow Fiber Micro



Material Characteristics



1	Case	Nylon66 + Glass Fiber
3	Filter Media	Polypropylene
4	Potting	polyurethane

About Transforming Technologies

Since 1998, Transforming Technologies has helped electronic manufacturing facilities to protect their products and processes from the many serious problems associated with static electricity.

Transforming Technologies offers a wide range of unique and outstanding products to detect, protect, eliminate and monitor electrostatic charges. Our products are integral components of an effective static control program.
