

WRXTS6 Thermal Stripper

Works with Single and Ribbon fiber

Introducing the WRXTS6 hand held thermal stripper from Optix America, specially designed for nondestructive thermal stripping of 250um, 900um, and ribbon cable up to 12 fibers. This tool makes stripping fiber cable quick and easy to do. Fast heating with four temperature levels requires less force for the stripping process. Rechargeable lithium battery provides up to 600 cycles of continuous stripping. Compatible with industry standard fiber holders (not included). Packaged with carrying case, thermal stripper, AC adapter, and cleaning brush.

Features

- Easily strips fiber optic single and ribbon cable
- Fast heating with four temperature levels
- Includes case, thermal stripper, AC adapter, and cleaning brush
- Compatible with industry standard fiber holders (not included)
- Rechargeable lithium battery
- 600 cycles of continuous stripping
- Ergonomic design, small size and lightweight
- Reach, CE, ROHS international standard

Specifications

Parameter	Value
Applicable Fiber	250um single fiber, 900um single fiber, Ribbon cable up to 12 fibers
Temperature Setting	60, 80, 100, 120 degrees Celsius
Heating time	Ten seconds first heating; Zero to five seconds after first heating
Battery Capacity	2000mAh Lithium battery. Full charge time three hours
Fiber holders	Required. Compatible with industry standard fiber holders
Power Supply	AC Adapter, input: AC100-240V(50/60HZ), output: DC12V-1A

Ordering Information

Part Number	Description
WRXTS6	Thermal stripper for single and ribbon fiber includes carrying case, AC adapter, and brush. fiber holders not included.
