

5MP 25mm Telephoto Lens for Raspberry Pi – M12 – 18 Degree FOV

Product ID: 5697

Description

This is the 25mm 5MP Telephoto Lens, an essential for the M12 Raspberry Pi High-Quality Camera. It has a narrow field of view and high lens magnification for seeing things far away, like a telescope!

Telephoto lenses are great for distance shots – especially good when you need to take photos or videos of far-away cats. Includes a thumbscrew to quickly and easily assemble onto the HQ Camera Board.

For use with the M12 Raspberry Pi HQ camera only. We also carry a 2.7mm 12MP Wide Angle Lens.
