ISL8115DEMO1Z

Synchronous Buck Converter

AN1919
Rev 2.00
March 11, 2015

Introduction

The ISL8115DEMO1Z is a compact reference design Synchronous Buck Converter (28.19mmx16.89mm) implementing Intersil's wide input range PWM controller ISL8115. Utilizing voltage mode control with input feed-forward, the ISL8115DEMO1Z maintains a constant loop gain for optimal transient response, especially for applications with a wide input voltage range. For a more detailed description of the ISL8115 functionality, refer to the ISL8115 datasheet.

This user guide includes the test setup, typical performance waveforms, schematic, layout and bill of materials (BOM).

Specifications

TABLE 1. DEMONSTRATION BOARD ELECTRICAL SPECIFICATIONS

SPEC	DESCRIPTION	MIN	TYP	MAX	UNIT
V_{IN}	Input voltage range	16	24	36	V
V_{OUT}	Output voltage		5		V
I_{OUT}	Output rated current		10		A
I_{OC}	Overcurrent threshold		13		A
f_{sw}	Switching frequency		600		kHz
Input UVP	Rising threshold		15		V
	Falling threshold		14.2		V
η	Efficiency at 24V input full load (10A)		90.12		%

FIGURE 1. ISL8115DEMO1Z DEMONSTRATION BOARD

Key Features

- Small, compact design
- Fast transient response
  - Voltage-mode PWM leading-edge modulation with nonlinear control
  - Input voltage feed-forward
- Integrated 5V high speed 4A MOSFET gate drivers
  - Internal bootstrap diode
- Oscillator programmable from 150kHz to 1.5MHz
  - Frequency synchronization to external clock signal
- Diode emulation mode for light load efficiency improvement
- Output OVP/UVP; OCP and OTP
- Adjustable soft-start
- Prebias start-up function
- Excellent output voltage regulation
  - 0.6V ±1.0% internal reference (-40°C~+125°C)
  - 0.6V ±0.7% internal reference (-40°C~+105°C)
  - Differential voltage sensing

References

Ordering Information

PART NUMBER	DESCRIPTION
ISL8115DEMO1Z	Demonstration Board for ISL8115

Recommended Equipment

- Input power source up to 36V supply voltage with 125W power supply ability
- Electronic load with 100W power sinking ability
- Voltmeters and ammeters
- 100MHz quad-trace oscilloscope

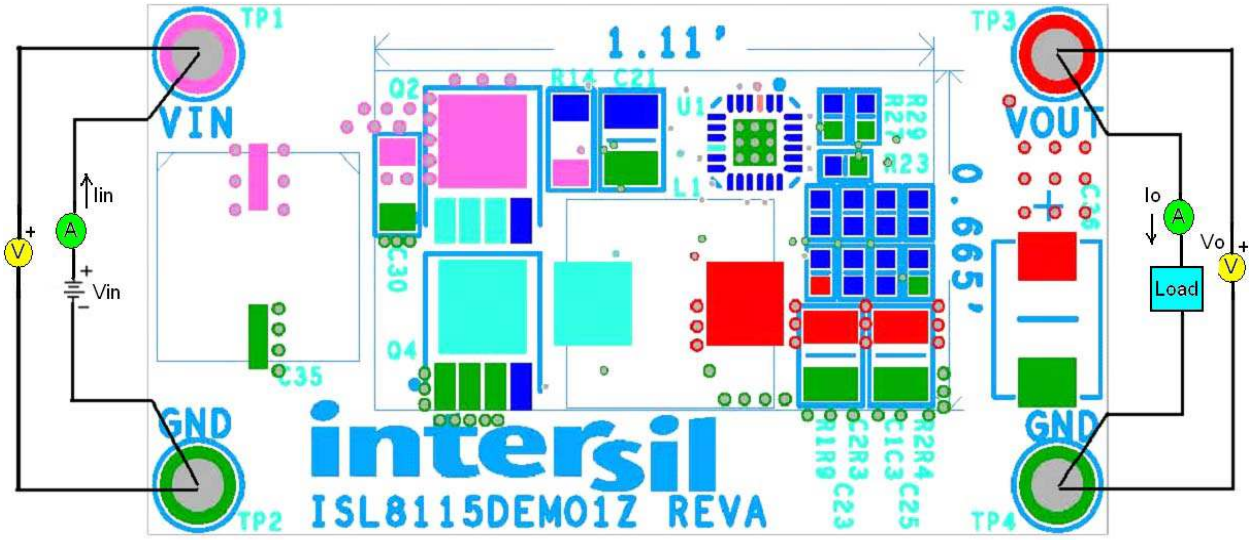

FIGURE 2. ISL8115DEMO1Z TEST SETUP

Quick Test Setup

1. Ensure that the demonstration board is correctly connected to the power supply and the electronic load prior to applying any power. Refer to Figure 2 for proper setup.
2. Set the input voltage to 24V, turn on the power supply and observe output voltage. The output voltage variation should be within 5%.
3. Adjust load current within 10A. The output voltage variation should be within 5%.
4. Use oscilloscope to observe output ripple voltage and phase node ringing. For accurate measurement, refer to Figure 3 for proper setup.

Probe Setup

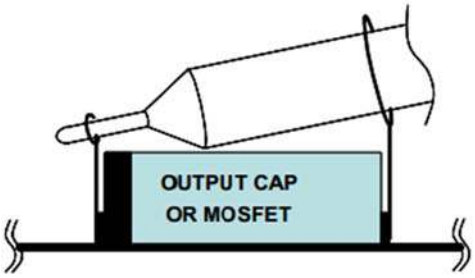

FIGURE 3. OSCILLOSCOPE PROBE SETUP

Design Guide

The ISL8115DEMO1Z is optimized for 16V to 36V input voltage range. However, the evaluation board can be modified to support multiple applications due to the customer's requirements. Refer to the ISL8115 datasheet for detailed information.

TABLE 2. 12V APPLICATION

V_{IN}	R_{35}
12V	71.5k

Quick modify to 12V input application, Table 2 can be followed. Some other modifications need to be made at the same time if best performance is expected.

Output Voltage Adjustment

The output voltage can be set by the resistors R_4 and R_1. In order to keep the existing compensation parameters unchanged, adjust R_4 to set the output voltage by the following Equation 1:

$$R_4 = \frac{0.6V \times R_1}{V_{OUT} - 0.6V} \quad \text{(EQ. 1)}$$

The VMON monitors the output for UVP and OVP, the resistor divider value of R_{11}/R_8 should be the same with the R_1/R_4.

Synchronization

The ISL8115DEMOZ board can be synchronized with an external clock. Applying a clock signal (10% to 90% duty cycle) in the range of 150kHz to 1.5MHz to the FSET pin makes the internal frequency synchronized with the external clock. Please remove R_{27} when the synchronized function is implemented.

Typical Performance Curves

Unless otherwise specified, the input voltage is 28V.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: “Standard” and “High Quality”. The intended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below.

   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

   Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user’s manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user’s manuals, application notes, “General Notes for Handling and Using Semiconductor Devices” in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.
