## Item description

### Short description:

WAGO's signal conditioner converts, amplifies, filters, and electrically isolates analog signals.

### Features:

- Analog unipolar/bipolar signals at both input and output
- Digital signal output reacts to configured measurement range limits (configurable on/off switching delay and threshold value switch function with up to two threshold values).
- Digital HOLD input freezes the output signal.
- Clipping capability for analog signal limitation to output end values
- Adjustable software/hardware filter
- Input/output response simulation via configuration display

## Data Notes

### Note

- This product is supplied with 24 VDC, which can be commoned using lateral push-in type jumper bars: (6.1)  $U_S^+$  (BR) and (6.2) GND 2 (BR). With this variant, it is necessary to ensure that the maximum permissible total current of 1 A is not exceeded.
- Additional setting options via WAGO Interface Configuration Software or WAGO Interface Configuration App
