BLUENRG-2 AND BLUENRG-2N

IoT-ready Bluetooth® Low Energy processors

BlueNRG-2 and BlueNRG-2N boost RF performance and ensure reliable connectivity in Smart Things

Compliant with Bluetooth LE 5.0 specifications, ST's BlueNRG-2 and BlueNRG-2N Bluetooth LE application and network processors ensure interoperability with the latest generation of smartphones and offer ultra-low current consumption with robust RF performance, increasing the battery lifetime of applications.

ST's Bluetooth LE stack adds state-of-the-art communication, security and privacy along with an Data Packet Length Extension for a faster data transfer.

KEY FEATURES & BENEFITS

- Bluetooth LE 5.0 certification to ensure interoperability with the latest generation of smartphones and tablets
- State-of-the-art security and privacy features to protect against eaves dropping attacks during pairing stage
- Faster data transfer rate with data packet length extension to boost Over-The-Air firmware update in the field
- Extended battery life thanks to very high efficiency combined with ultra-low latency technology
- Excellent RF link budget (up to 96 dB)
- Accurate RSSI for power control
- Up to 8 dBm maximum output power
- Operating temperature up to 105 °C

KEY APPLICATIONS

- Smart watches, fitness, wellness and sport wearables
- Consumer medical
- Security/proximity
- Remote control
- Home and industrial automation
- Assisted living
- Mobile phone peripherals
- Lighting
- PC peripherals

BLUENRG-2 AND BLUENRG-2N PROCESSORS

The BlueNRG-2 and BlueNRG-2N processors offer excellent RF performance, robustness and connection reliability. The integrated high-efficiency DC/DC converter enables ultra-low power figures with an enhanced sleep mode, extending battery lifetime. The BlueNRG-2 and BlueNRG-2N come with a full-featured eco-system of tools, evaluation boards and software development kits (SDKs). Suitable for 9-axis Sensor Fusion (MotionFX library), ADPCM audio compression (BlueVoice library), and Bluetooth SIG Mesh-ready. The Navigator PC GUI allows users to quickly run examples and start developing new projects out-of-the-box. BlueNRG-2 and BlueNRG-2N are part of ST's 10-year longevity program.

Bon deripsen vider	BlueNRG-2	BlueNRG-2N
Device	Bluetooth LE 5.0 single-mode SoC	Bluetooth LE 5.0 single-mode network processor
Core	32-bit Cortex-M0 up to 32MHz	MCU Companion
Memory	256 Kbytes upgradable Flash (both Bluetooth LE stack and application code)	24 Kbytes ultra-low-leakage RAM with full-data retention Pre-loaded and upgradable Bluetooth LE stack
Peripherals	SPI, UART, I²C, PDM stream processor, ADC, RTC, Timers, Watchdog and DMA controller	Selectable SPI or UART interface (via 1 GPIO)
Package	QFN48, 26 GPIOs, 6 x 6 mm QFN32, 15 GPIOs, 5 x 5 mm WLCSP34, 14GPIOs, 2.56 x 2.66 mm	QFN32, 5 x 5 mm WLCSP34, 2.56 x 2.66 mm
