

TG-FAM

Flexible Absorbing Material

RoHS Compliant

Features

- Effective EMI suppression in a wide frequency range
- Ultra thin and extremely flexible, easy application in various spatial configurations
- Non-conductive adhesive backing (UL) available
- Effective in preventing resonance and suppressing coupling
- High surface resistance
- Easy and fast to process
- Can easily be cut into any shape

Applications

Electronic components - Notebooks, PCs, workstations, LNBs for satellite systems, Mobile communications equipment, Base Stations for mobile phones, PHS, Peripheral devices for computers, Wireless equipment, Mobile Phones, High speed clocks, RFID, NFC, Wireless Charger, etc.

In addition to EMI-related applications, FAM can handle the issue when RFID tags attached to metal (by recovering up to 80% of the original reading distance). It is suitable for LF(125KHz) and HF(13.56MHz) bands. This allows for the space to be saved between RFID and metal. By this way can save the space from RFID to metal.

Properties

Physical Properties	TG-FAM1	TG-FAM3	TG-FAM6	TG-FAM7	Unit
Frequency	0.001~18.0		0.001~9.0	0.001~3.0	GHz
Thickness	0.12~2.50	0.25/0.50/0.75	0.05/0.1/0.2/0.3/0.5	0.08/0.12/0.22	mm
Maximum Size	400×400		210×297 (A4 size)	130×130	mm
Material	Magnetic Particles+Rubber			Sintering iron-core	-
Magnetic Inductivity (μ' @1MHz)	25	50	170	140	-
Halogen	Halogen contained		Halogen free		-
Working Temperature	-40~+85		-40~+155	-30~+120	°C
Density	3.6	4.8	4.4	3.8	g/cm ³
Surface Resistance	10 ⁶	10 ⁶	10 ⁵	10 ⁹	Ohm
Structure	<div style="border: 1px solid black; padding: 5px; text-align: center;"> FAM 2-sided adhesive tape Release paper </div> <p>It can have no / one sided / two-sided adhesive tape</p>			<div style="border: 1px solid black; padding: 5px; text-align: center;"> PET Tape FAM 2-sided adhesive tape Release paper </div> <p>It can have one sided PET / one sided adhesive tape or two-sided adhesive tape</p>	-

T-Global Technology are proud to announce the launch of a new company logo and mission statement as part of the ongoing growth and evolution of our company's brand.

NOTICE: The information contained herein is to the best of our knowledge true and accurate. Values stated in this technical data sheet represent typical values as not all tests are run on each lot of material produced. All specifications are subject to change without notice. The protective film and release paper does not affect the function of the product. If there is no special requirement, the default depends on T-Global. Since the varied conditions of potential use are beyond our control, all recommendations or suggestions are presented without guarantee or responsibility on our part and users should make their own test to determine the suitability of our products in any specific situation. This product is sold without warranty either expressed or implied, of fitness for a particular purpose or otherwise, except that this product shall be of standard quality, and except to the extent otherwise stated in T-Global Technology's invoice, quotation, or order acknowledgment. We disclaim any and all liabilities incurred in connection with the use of information contained herein, or otherwise. All risks of such are assumed by the user. Furthermore, nothing contained herein shall be construed as a recommendation to use any process or to manufacture or to use any product in conflict with existing or future patents covering any product or material or its use.

Magnetic Shielding

FAM can change the magnetic flux path to avoid the magnetic flux affect others components.

Application for RFID NFC on metal

Magnetic Inductivity ($\mu = \mu' - j \mu''$)
