

Metal Screw Nut and Mounting Kit -M2

SKU:FIT0665

INTRODUCTION

The mounting kit is an M2 screw set with screws, nuts and a variety of lengths of single-head, double-pass hexagonal copper columns, for a total of 320 pieces. The M2-size screw set is suitable for motherboards, sensors or other devices with M2 mounting holes (2mm). The metal material ensures the stability of the component installation.

The screw set models included in this mounting kit are commonly used. You don't have to waste time looking for these tiny accessories during projects making progress. Screws, nuts and hexagonal copper columns are placed in small storage boxes for easy storage and cleanliness, which will make your workbench cleaner.

Note: Since the quantity is determined by weighing, there may be a screw quantity error. Usually the number of deviations does not exceed one or two.

SPECIFICATION

Copper column-F/M(M2*5+3mm) x25

Copper column-F/M(M2*10+3mm) x25

Copper column-F/M(M2*15+3mm) x25

Copper column-F/M(M2*20+3mm) x25

Copper column-F/F(M2*5mm) x25

Copper column-F/F(M2*10mm) x25

Copper column-F/F(M2*15mm) x25

Copper column-F/F(M2*20mm) x25
