NOTE: Electrostatic discharge

Electrostatic discharge can damage or destroy components. When handling the device, observe the necessary safety precautions against electrostatic discharge (ESD) in accordance with EN 61340-5-1 and IEC 61340-5-1.

3.2 Maximum electrical values

- i** In this specification, all voltages are in reference to ground (GND).
Permanent damage will be caused to the device if the maximum values are exceeded. Furthermore, this device may not function properly at the maximum values.

These are only load values:

Description		Min.	Max.
Logic power supply	V_{CC}	-0.3 V	3.6 V
Input voltage	V_I	-0.3 V	$V_{CC} + 0.5 V$

3.3 Electrical properties (operation)

- i** Correct operation of the device is only ensured in accordance with the specifications provided in the table.

At an ambient temperature of +25°C

Condition		Min.	Typ.	Max.
Logic power supply				
V_{CC}		2.6 V	2.8 V	3.3 V
Input voltage				
V_{IH}	High level	$0.8 \times V_{CC}$	-	$1 \times V_{CC}$
V_{IL}	Low level	GND	-	$0.2 \times V_{CC}$
Logic current consumption
