

Application Tooling Specification Sheet

Order No. 63904-0500

FEATURES THIS APPLICATOR IS FOR AUTOMATIC WIRE PROCESSOR USE ONLY.

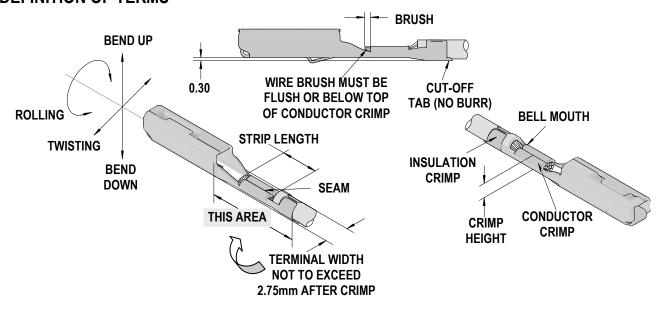

- Quick punch removal with the push of a button for fast and easy tooling change
- Applicator designed to industry standard mounting and shut height 135.80mm (5.346")
- Quick set-up time; plus the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of .015mm (.0006") for conductor crimp height and .063mm (.0025") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other
- Directly adapts to most automatic wire processing machines

SCOPE

<u>Products:</u> SRC Connector using MX150 Receptacle Terminals, 1.00mm² wires.

| Terminal Series No. | Torminal | Order No | Wire Size | | Insulation | Diameter | Strip Length | | |
|--|--------------------|------------|-----------|------|------------|----------|--------------|---------|--|
| Terminal Series No. | Terminal Order No. | | Wire Type | mm² | mm | ln. | mm | ln. | |
| 33001 | 33001-3004 | 33001-5002 | FLRY-B | 1.00 | 1.90-2.10 | .075083 | 4.70-5.60 | .185220 | |
| 33012 | 33012-3002 | | FLRY-B | 1.00 | 1.90-2.10 | .075083 | 4.70-5.60 | .185220 | |
| Terminals were validated using the following wire specifications: ISO 6722-1, Class B. | | | | | | | | | |

DEFINITION OF TERMS

Doc No: ATS-639040500 Release Date: 02-24-16 **UNCONTROLLED COPY** Page 1 of 6 Revision: A Revision Date: 02-24-16

CRIMP SPECIFICATION

| Terminal Series No. | Bell n | nouth | Cut-off T | ab (Max) | ◆Conductor Brush (Max) | | |
|---------------------|-----------|---------|-----------|----------|------------------------|------|--|
| | mm | ln. | mm | ln. | mm | ln. | |
| 33001 | 0.30-0.70 | .012028 | 0.50 | .020 | 0.40 | .016 | |
| 33012 | 0.30-0.70 | .012028 | 0.50 | .020 | 0.40 | .016 | |

[→] Wire brush must be flush or below top of Conductor Crimp.

◆ THIS APPLICATOR IS INTENDED FOR AUTOMATIC WIRE PROCESSOR USE ONLY.

It is very important that the brush length is consistently within specification for this sealed connector system to work properly. This applicator should only be run in a properly setup automatic wire processor in order to consistently achieve the brush length. Any attempt to use this applicator outside a properly setup automatic wire processor will likely not meet the brush specification and cause this sealed connector system to not work properly.

| Terminal | Dand up I | Twist Roll | | Pı | ınch W | idth (R | ef) | 0 | |
|------------|-------------------|------------|--------|-----------|--------|------------|------|----------------|--|
| Series No. | Bend up Bend down | | | Conductor | | Insulation | | Conductor Seam | |
| Series No. | Degree | | Degree | | mm | ln | mm | ln | Seam shall not be open and no wire allowed |
| 33001 | 3 | 3 | 3 | 3 | 2.10 | .083 | 2.26 | .089 | out of the crimping area |
| 33012 | 3 | 3 | 3 | 3 | 2.10 | .083 | 2.26 | .089 | out of the offiniping area |

After crimping, the crimp profiles should measure the following:

| Torminal | Terminal Wire Size | | Conductor | | | | Insulation | | | | Pull Force | |
|------------|--------------------|-----------------|--------------|---------|-------------|---------|--------------------|------|-------------------|------|------------|------|
| Series No. | | | Crimp Height | | Crimp Width | | Crimp Height (Ref) | | Crimp Width (Ref) | | Minimum | |
| Series No. | Wire Type | mm ² | mm | ln. | mm | ln. | mm | ln. | mm | ln. | N | Lb. |
| 33001 | FLRY-B | 1.00 | 1.25-1.35 | .049053 | 2.05-2.25 | .081089 | 2.35 | .093 | 2.30 | .091 | 120 | 27.0 |
| 33012 | FLRY-B | 1.00 | 1.25-1.35 | .049053 | 2.05-2.25 | .081089 | 2.35 | .093 | 2.30 | .091 | 120 | 27.0 |

Tool Qualification Notes:

- 1. Pull Force should be measured with no influence from the insulation crimp.
- 2. The above specifications are guidelines to an optimum crimp.

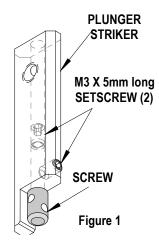

Doc No: ATS-639040500 Release Date: 02-24-16 **UNCONTROLLED COPY** Page 2 of 6 Revision: A Revision Date: 02-24-16

Adjusting the Wire Bend Angle:

(See Item11 in parts list and assembly drawing.)

Note: If the Wire Bend is present after crimping use the following method to remove the bend. This tooling may not be necessary for all wire gauges.

- 1. The screw is provided for wire straightening. See Figure 1.
- 2. Loosen the (2) M3 x 5mm long setscrews; see Figure 1, before turning the screw.
- 3. Start by adjusting the screw so it just touches the insulation outside diameter of the wire being crimped. If wire Bend Up exists, turn the screw a guarter turn clockwise (CW) to lengthen it.
- 4. Continue to adjust the length of the screw until the wire appears to be straight after crimping. If wire Bend Down exists, turn the screw a quarter turn counter clockwise (CCW) to shorten it. Continue to adjust the length of the screw until the wire appears to be straight after crimping.
- 5. Tighten the M3 x 5mm long setscrews, when finished adjusting the screw. Two M3 x 5mm long setscrews are provided; the top setscrew is to lock the screw after adjustments. The M3 x 5mm long setscrew on the side of plunger striker is used when making adjustments.

Adjusting the Wire Brush Length

(See Item13 in parts list and assembly drawing.)

- 1. If the wire brush is too long or extends above the top of the conductor crimp, adjust the Wire Stop, Item 13, closer to the conductor punch.
- 2. If the wire brush is too short, adjust the Wire Stop further away from the conductor punch.

NOTES

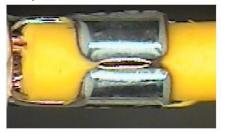

- 1. Molex recommends an extra perishable tooling kit be maintained at your facility.
- 2. Verify tooling alignment by manually cycling the press and Applicator before crimping under power. Check that all screws are tight.
- 3. Slugs, Terminals, Dirt and Oil should be kept clear of work area.
- 4. Wear safety glasses at all times.
- 5. For recommended maintenance refer to the FineAdjust Manual.

Insulation Attribute Notes:

In order to help ensure the integrity of the connector seal, the design intent is to partially bury the insulation grips into the wire insulation. Due to this, skiving of the insulation may occur. This skiving attribute is acceptable. Below are examples of insulation skiving that may be seen with this connector system.

CAUTION: This applicator should only be used in a press with a shut height of 135.80 mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury never operate this Applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

CAUTION: These Molex crimp specifications are valid only when used with Molex terminals, applicators and tooling qualified by Molex. When using non-Molex tooling with this specific connector system listed in this document, the Molex qualification does not apply and the responsibility for full qualification of the connector system is that of the customer. Molex accepts no liability for tooling support where non-Molex tooling is used.
