

Type SN 85 °C Non-Polar Aluminum Electrolytic Capacitors

85 °C, Radial Leaded Non-Polar Aluminum Electrolytic

Type SN is a non-polar radial leaded aluminum electrolytic capacitor with a +85 °C, 1000 hours life rating. The SN is ideal for applications where the polarity is unknown or reversed such as signal coupling circuits and speakers.

Highlights

- Non-polar
- +85 °C
- Good for unknown polarity applications
- Available in T&R and ammo pack

Specifications

Capacitance Range:	0.47 to 2200 µF
Voltage Range:	6.3 to 100 WVNP
Capacitance Tolerance:	±20%
Operating Temperature Range:	−40 °C to +85 °C
DC Leakage Current:	After 2 minutes, +20 °C at rated voltage

$$I = .03CV + 4 \mu\text{A Max}$$

C = Capacitance in (µF)
V = Rated voltage
I = Leakage current in µA

Dissipation Factor @ 120 Hz, +25 °C:

WV (V)	6.3	10	16	25	35	50	100
DF(%)	24	20	17	15	14	12	10

For capacitance values > 1000 µF, the DF (%) value is increased 2% for every additional 1000 µF

Load Life: Apply WVNP for 1,000 hours at +85 °C with polarity inverted every 250 hours
Capacitance change within 20% of initial limit
DC leakage current meets initial limits
ESR ≤ 200% of initial value

Shelf Life: 500 hrs with no voltage applied at +85 °C
Cap change within 25% from initial limits
DC leakage ≤ 200% of initial value
ESR ≤ 200% of initial value

Outline Drawing

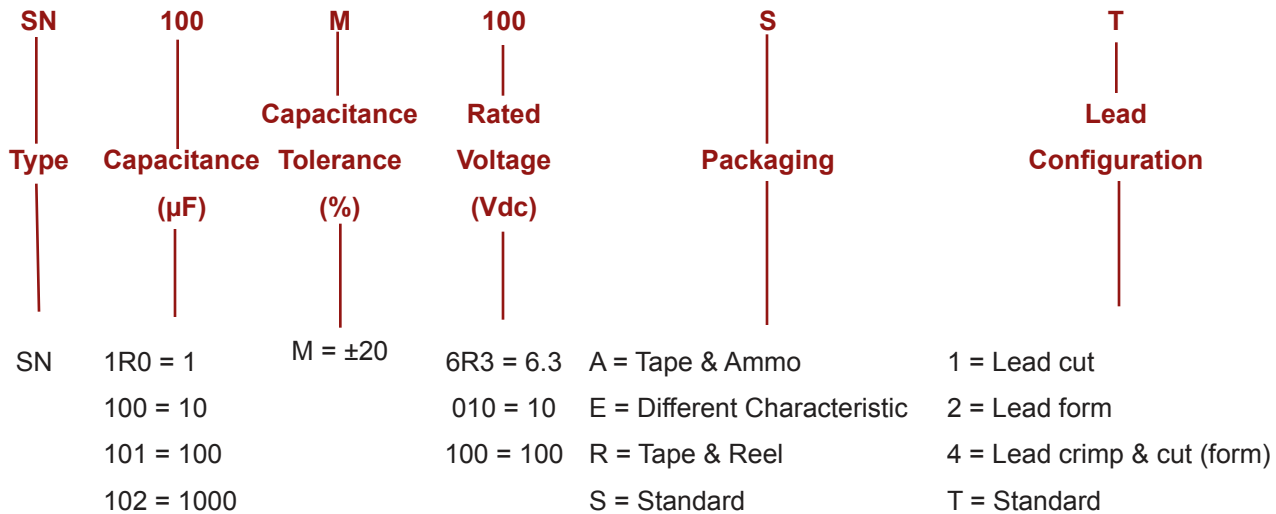

Case vented on diameters 6.3 and greater.

Vinyl sleeve adds .5 Max. to diameter and 2.0 Max. to length.

Notice and Disclaimer: All product drawings, descriptions, specifications, statements, information and data (collectively, the "Information") in this datasheet or other publication are subject to change. The customer is responsible for checking, confirming and verifying the extent to which the Information contained in this datasheet or other publication is applicable to an order at the time the order is placed. All Information given herein is believed to be accurate and reliable, but it is presented without any guarantee, warranty, representation or responsibility of any kind, expressed or implied. Statements of suitability for certain applications are based on the knowledge that the Cornell Dubilier company providing such statements ("Cornell Dubilier") has of operating conditions that such Cornell Dubilier company regards as typical for such applications, but are not intended to constitute any guarantee, warranty or representation regarding any such matter – and Cornell Dubilier specifically and expressly disclaims any guarantee, warranty or representation concerning the suitability for a specific customer application, use, storage, transportation, or operating environment. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by Cornell Dubilier with reference to the use of any Cornell Dubilier products is given gratis (unless otherwise specified by Cornell Dubilier), and Cornell Dubilier assumes no obligation or liability for the advice given or results obtained. Although Cornell Dubilier strives to apply the most stringent quality and safety standards regarding the design and manufacturing of its products, in light of the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies or other appropriate protective measures) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage. Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated in such warnings, cautions and notes, or that other safety measures may not be required.
