GELID Silent Series (80mm, 90mm & 120mm)

Case Fans with Pulse Width Modulation (PWM) Control

Designed for advanced users GELID Silent PWM fans provide additional airflow by using Pulse Width Modulation to automatically adjust fan speed according to the CPU temperature. The fan can be idled down and thus be much quieter. A high quality IC has been integrated into the fan's PCB to exploit your mainboard's BIOS software. This technology is more efficient and convenient than using an external fan controller to adjust the voltage. Each fan impeller has been individually balanced using the latest technology to guarantee steady, unwavering operation. To add to the silence fan mounts replace traditional screws and are made of high quality, temperature resistant, extra long lasting rubber and stop vibrations from the fan motor from travelling into your PC case.

FEATURES

Hydro Dynamic Bearing	Pulse Width Modulation (PWM)	High Airflow
Rubber Fan Mounts	Optimized Fan Blades	Silent Operation
Long Lifetime (50'000 h MTTF at 40°C)	High Static Pressure	5 Years Warranty

GELID PWM FAN CURVE
