

TECHNICAL DATA SHEET

The PE15A5082 is a Class AB high power amplifier with an integrated Heatsink/Cooling Fan assembly that operates in L and S bands from 1000 MHz to 2500 MHz and generates 18 Watts of CW RF power and 2.5 Watts of linear power with 5% EVM @ 34 dBm. The module utilizes the latest Gallium Nitride (GaN) semiconductor technology with 30% to 50% power added efficiency. The amplifier package design features a small form factor of 3.9in³ that's ideal for size, weight, and power (SWaP) constrained applications used in broadband RF telemetry, tactical communication, electronic warfare, and unmanned aircraft systems, as well as software defined radios. Impressive typical performance includes 47 dB of linear gain, 1.8:1 VSWR, +42 dBm third order intercept point, and harmonic suppression of -11 dBc. Additionally with a nominal 0 dBm (1 mW) RF input power, the amplifier can provide 40 dB of gain. Operating voltage is +28 Vdc with 1.9A of DC current. Additional features include overvoltage protection, reverse voltage protection, and logic on/off control. The rugged Mil-Grade assembly supports female SMA RF input/output connectors and a micro-D 9 pin socket command control connector with an accessory cable assembly included. The integrated heatsink with cooling fan operates at +28Vdc and includes an accessory cable with banana plugs. The operating baseplate temperature range is -40°C to +85°C and the unit is guaranteed to withstand up to 95% relative humidity, altitude levels up to 30,000 ft, and random vibration and shock profiles (see chart below). Pasternak also offers an accessory Harmonic filter option, model PEHFL0000 that can be used at the output of the power amplifier. This lowpass RF filter has low insertion loss with power handling up to 50W and specifically designed to reduce harmonics at the output of transmitters operating at up through L & S Bands and offers rejection levels of greater than 25 dB from 3.25 GHz to 5 GHz. The filter is offered in a miniature SMA connectorized package.

• PAE: 30% to 50%

• 50 Ohm Design

Female SMA RF Connectors

+28Vdc @1.9A DC current

Features

- 18W GaN High Power Amplifier
- Integrated Heatsink/Cooling Fan Assembly
- · L & S Band Class AB Design
- · Frequency Range: 1000 MHz to 2500 MHz
- 47 dB linear Gain
- VSWR: 1.8:1
- +42 dBm IP3
- 2.5W Linear Power with 5% EVM @ 43 dBm

Applications

- Broadband RF Telemetry
- RF Communications Systems

- Electronic Warfare Airborne Electronic Attack
- Unmanned Aircraft Systems
- (UAS) Unmanned Ground Vehicles (UGV), Software Defined Radios
- Data Links

-40°C to +85°C Operating Baseplate Temperature

Output Harmonic Filter Accessory Option

Small Form Factor Rugged Mil-Grade Package

- Transmitters
- Test & Measurement
- Telecom Infrastructure

Electrical Specifications (TA = +25°C, DC Voltage = 28Volts, DC Current = 1.9A)

Description	Minimum	Typical	Maximum	Units
