MCW Chair Weighing Scale

ADAM®

The MCW 300L chair scale provides an affordable and practical solution to address the challenge of weighing patients with limited mobility or who are unable to stand. MCW combines sturdy construction with functionality, minimizing the difficulty of lifting patients and eliminating the need to move heavy health scales. The scale's swivel feet and arm rests add comfort for patients during the weighing process, making it easier for them to get in and out of the chair. Portability is not an issue, as the swivel wheels pivot smoothly, while the scale's built-in battery eliminates the inconvenience of being tethered to an electrical outlet by a power cord. Weight is measured in kilograms or pounds and the MCW 300L calculates body mass index (BMI).
