

250 W mainstream compressor solution based on STSPIN32F0601Q and STGD5H60DF

Features

- Complete system solution made by ready-to-use hardware and firmware
- Fitting wide range of applications supplied from the mains, rated up to 250 W:
 - refrigerator compressors
 - pumps and fans
 - industrial appliances
- High efficiency value:
 - Inverter efficiency > 96.5% at 3000 rpm
- Very low stand-by power consumption and overcurrent/undervoltage protections
- Based on [STSPIN32F0601Q](#) intelligent 3-phase motor controller with embedded STM32
- Power supply based on [VIPER122](#) in buck configuration to generate on-board DC voltages
- Inverter power stage based on [STGD5H60DF](#) IGBT rated 600 V and 5 A
- Compact size: 7.5 x 11.2 cm
- Equipped with proven sensorless field-oriented control (FOC) firmware in one-shunt or 2+1 shunt topology
- RoHS compliant

Description

The [STEVAL-CTM011V1](#) is a three-phase inverter based on the [STSPIN32F0601Q](#) controller, which embeds a 3-phase 600 V gate driver and an Arm® Cortex®-M0 STM32 MCU. The power stage features [STGD5H60DF](#) IGBTs.

The board supports one-shunt and two- plus one-shunt sensing topology. You can properly set the shunt topology by populating the related shunt resistors (RS1, RS2, and RS3).

Moreover, you can implement a sensorless field-oriented control (FOC). This allows driving permanent magnet synchronous motors (PMSMs) and brushless DC (BLDC) motors to cover a wide range of applications, such as refrigerator compressors, pumps, fans, and industrial appliances.

The [STEVAL-CTM011V1](#) evaluation board is compatible with a wide range of input voltages. It includes a power supply stage with the [VIPER122](#) in buck configuration that generates +15 V and +3.3 V supply voltages required by the application.

The companion firmware is [X-CUBE-MCSDK](#), available for download on www.st.com, to be used with the [STSW-CTM011](#) firmware example for compressor motors.

You can compile, debug, and configure the firmware through the [STM32CubeIDE](#) and [B-STLINK-ISOL](#) plus [STLINK-V3SET](#).

SWD and UART TX-RX connectors are also available.

Product summary

250 W mainstream compressor solution based on STSPIN32F0601Q and STGD5H60DF	STEVAL-CTM011V1
Firmware example for compressor motors	STSW-CTM011
STM32 motor control software development kit	X-CUBE-MCSDK
600 V three-phase controller with MCU	STSPIN32F0601Q
H-series, 600 V, 5 A high-speed trench gate field-stop IGBT	STGD5H60DF
Applications	Motor Control
