Description

M/A-COM's MAPDCC0010 is an IC-based monolithic power divider using M/A-COM's GMIC technology in a low cost SOT-25 plastic package. This 2way power divider is ideally suited for applications where small size, low insertion loss, superior phase/ amplitude tracking and low cost are required. Typical applications include handsets, base station switching networks and other communication applications where size and PCB real estate are at a premium. Available in Tape and Reel.

The MAPDCC0010 is fabricated using a passiveintegrated circuit process. The process features fullchip passivation for increased performance and reliability.
