### Item description

The PFC100 Controller is a compact PLC for the modular WAGO I/O System. Besides network and fieldbus interfaces, the controller supports all digital, analog and specialty I/O modules found within the 750/753 Series.

Two ETHERNET interfaces and an integrated switch enable line topology wiring.

An integrated Webserver provides user configuration options, while displaying PFC100 status information.

Besides the processing industry and building automation, typical applications for the PFC100 include standard machinery and equipment control (e. g., packaging, bottling and manufacturing systems, as well as textile, metal and wood processing machines).

The DIP switch configures the last byte of the IP address and may be used for IP address assignment.

Programming per IEC 61131-3

- Programmable via *e!COCKPIT*

—  
Subject to changes. Please also observe the further product documentation!

- Direct connection of WAGO's I/O modules
- 2 x ETHERNET (configurable)
- Linux 3.18 operating system with RT-Preempt patch
- Configuration via *e!COCKPIT* or Web-Based Management interface
- Maintenance-free

| Type of memory card                               | microSD up to 32 GB (all guaranteed properties only valid with WAGO's memory card)   |
| Memory card slot                                  | Push-push mechanism; Cover lid (sealable)  |
| Number of modules per node (max.)                 | 250  |
| Number of modules without a bus extension (max.)  | 64   |
| Input and output process image (internal) max.    | 1000 words/1000 words  |
| Input and output process image (Modbus®) max.     | CODESYS V3: 32000 words/32000 words  |
| Indicators  | LED (SYS, RUN, I/O, USR) red/green/orange: Status of system, program, local data bus, status programmable by user (can be used via CODESYS library); LED (A, B) green: Status of system power supply, field supply |
| Supply voltage (system)                           | 24 VDC (-25 ... +30 %); via pluggable connector (CAGE CLAMP® connection)   |
| Input current (typ.) at nominal load (24 V)       | 550 mA   |
| Total current (system supply)                     | 1,700 mA   |
| Supply voltage (field)                            | 24 VDC (-25 ... +30 %); via power jumper contacts  |
| Current carrying capacity (power jumper contacts) | 10 A   |
| Number of outgoing power jumper contacts          | 3  |
| Isolation   | 500 V system/field   |

## Connection data

|   |  |
|---|--|
| Connection technology: communication/fieldbus | Modbus (TCP, UDP): 2 x RJ-45                 |
| Connection technology: system supply          | 2 x CAGE CLAMP®                              |
| Connection technology: field supply           | 6 x CAGE CLAMP®                              |
| Connection type 1                             | System/field supply                          |
| Solid conductor                               | 0.08 ... 2.5 mm <sup>2</sup> / 28 ... 14 AWG |
| Fine-stranded conductor                       | 0.08 ... 2.5 mm <sup>2</sup> / 28 ... 14 AWG |
| Strip length                                  | 8 ... 9 mm / 0.31 ... 0.35 inches            |
| Connection technology: device configuration   | 1 x Male connector; 4-pole                   |

## Physical data

|        |                        |
|--------|------------------------|
| Width  | 61.5 mm / 2.421 inches |
| Height | 100 mm / 3.937 inches  |

### Configuration and Commissioning Software

|  |               |         |          |
|--|---------------|---------|----------|
| WAGUpload  | 1.16.1.0      | zip     | Download |
| WAGUpload is a stand-alone PC software for transferring, backing up and restoring PLC applications on WAGO 750 Series controllers. | 2022 年2月2 日   | 12.4 MB |          |
| (759-316) WAGO Ethernet Settings / Serie 750   | 06.18.00.02   | zip     | Download |
|  | 2021 年11月11 日 | 20.0 MB |          |

## Runtime Software

### GitHub: Linux® Toolchain

|  |     |          |
|--|-----|----------|
| GitHub: Linux® Software Development Kit (SDK)  | URL | Download |
| With the PFC SDK, WAGO offers Linux® enthusiasts the opportunity to compile the PFC firmware themselves, and to expand it according to their own wishes. |     |          |

The WAGO PFC SDK includes a Pengutronix build environment, optimized for the PFC, and the OSELAS Toolchain, which open up the following possibilities, among others:

- Expanding the firmware functions using open source packages like: Python, SQLite3, PHP, etc.
- Compiling their own C/C++ applications with direct or indirect bus access to the local bus, CANopen, or PROFIBUS.
- Compiling external libraries using CODESYS V2 to expand the PLC applications.
- There are detailed instructions for many of these tasks and ideas (see WAGO GitHub HowTo's).

## Software Solutions (Applications)

### Application-Based Controller Redundancy

|  |             |          |          |
|--|-------------|----------|----------|
| Application-Based Controller Redundancy  | 2023-08-29  | zip      | Download |
| Increase availability in central ship alarm systems with WAGO's Application-Based Controller Redundancy (ACR). | 2023 年8月29日 | 414.0 MB |          |

The licensed software library (2759-0245/0211-1000) and an *e!COCKPIT* redundancy framework (LINK) allows you to easily program and operate redundant master PLCs in single point of failure (SPOF) tolerant systems.

A large number of the available 750 Series I/O Modules can be integrated into the system via Smart Couplers. These decentralized PLCs automatically recognize the input and output modules, which makes commissioning easy. The redundant communication of the two Master PLCs and the Smart Couplers is performed either via two separate networks (Dual-LAN) or a ring topology.

These Master PLCs (2nd generation PFC200) communicate with higher-level SCADA systems, for example, via the Modbus TCP protocol.

The application notes (a2020003 and a2020004) describe the practical use of the library and define the application area and the maximum number of participants within the system.

### digital TAP™ powered by MTConnect

|   |              |         |          |
|---|--------------|---------|----------|
| digitalTAP™ software, powered by MTConnect for application controllers corresponding to at least function group 0 (e.g. 750-8101/000-010) | 2.4.0.0      | zip     | Download |
|   | 2019 年12月13日 | 79.1 MB |          |

WAGO offers an economical solution for integrating machine data of existing systems into higher-level analytic software applications. DigitalTAP™ from WAGO captures your machine's information and converts it into digital signals that can be used by analytic and data logger applications. The solution provides real-time device data in a standardized format for every machine type. This solution requires no programming. The user merely needs to configure the wired inputs via a web visualization tool. Each input can be assigned a unique name individually with its own parameters, such as units and scaling range. These configuration parameters are stored automatically in the WAGO controller and are available immediately.

Through use of the open, licence-free MTConnect® standard, the machine information is formatted in a standardized table and uses proven Internet protocols for the data transport.
