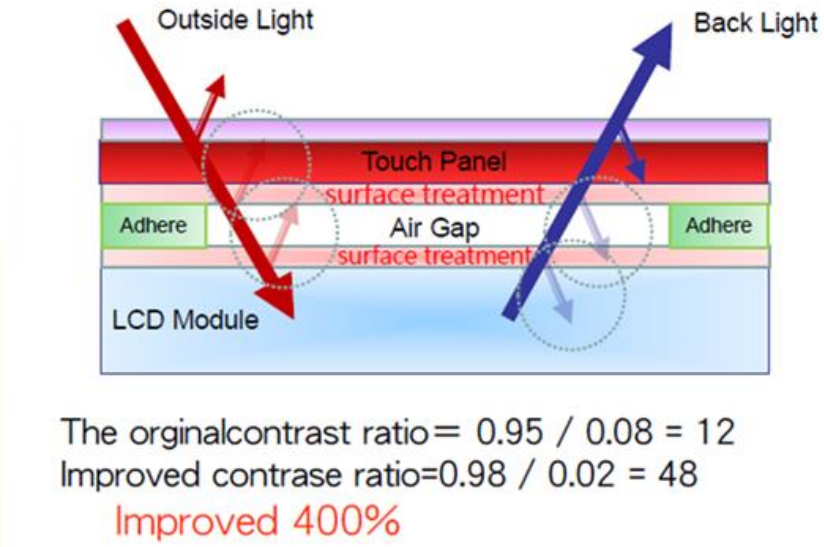
Chapter 2: General description

The IK Intelligent Display is a "Plug & Play" graphic display module developed & produced in France.

It consists of a TFT-LCD 7 "WVGA (800 x 480 pixels) display with integrated HMI board from CLAIRITEC and a metal protective cover.

Unlike the standard version, the IK Intelligent Display is equipped with a 4mm tempered glass optically bonded on top of the touch panel to withstand an IK09 index (IK10 possible with thicker glass). Besides, this display is twice brighter than the standard version and sunlight readable.



The IK Intelligent Display is EMC compliant and withstands a temperature range from -20°C to +70°C.

It can fit easily into electronic equipment thanks to its 4 fixing points but a close attention must be paid to the integration in the system to withstand the IK index (the shock should not be transmitted to the 4 fixing points) :
