

MESSRS:

Product Drawing

CUSTOMER'S PRODUCT NAME:

TDK PRODUCT NAME: DC/AC INVERTER UNIT CXA- 0538-A

*Notice

Product Drawing is not contract. This is only technical data.

This technical data may change internal description without any notice.

When you design final product please request us specification through our sales or distributors. After you receive the specification, the contract is effective on signature of the specification.

TDK-Lambda Corporation

Precautionary Notes Regarding the Use of This Inverter

When using this product, give due consideration to the precautionary notes described below and ensure a safe design. Inappropriate use may result in electric shock, injury or fire.

	<u> </u>	•		<u>^</u>		
	<u></u> W	arning		<u>/4</u> \		
• This product is subject to high Failing to do so may result in e		buch it while the po	ower is on.			
	<u> </u>	aution				
 Do not use it with any other load. Store this product under the conditions defined in the specification document. Do not store this product in an environment where dust, dirt or corrosive gas(salt,acid,base, etc.) is present. This product is subject to high voltage. If there is a possibility that the user may touch the product, provide a proper warning indication in order to draw the user's attention. This product is designed for use with general electronic equipment. If it is to be used with medical equipment that directly affects human life or for the control of transportation equipment to which passengers entrust their lives, provide thorough fail-safe measures. Consult us before using if this product is to be installed in a habitual vibration environment (vehicle, etc.). Avoid using this product under high temperatures or high humidity or in an environment in which dust, dirt or any corrosive gas (salt,acid,base, etc.) is present. Also,be careful not to allow the formation of dew condensation. It may result in damage or electric shock. If the product does not have a built-in protective circuit (circuit breaker, fuse, etc.), it is recommended that a fuse be used at the input stage to prevent the generation of smoke or fire in the event of a malfunction. Even when the product has a built-in protective circuit (circuit breaker, fuse, etc.) be provided separately from the built-in circuit. Use the product only within the specified input voltage, output power, output voltage and operating temperature ranges. Exceeding these values may result in damage, etc. Provide a measure for the prevention of surge voltage due to lightning, etc. Abnormal voltage may result in damage, etc. To prevent problems from occurring as a result of a short circuit in the high voltage section, be sure to take appropriate portect the inverter from vibration and shock, be sure to use all the mount						
	Handli	ng Precautic	ons			
 This product uses thin wires. Observe the following precautions and handle it with care so as not to cause wire breakage. Broken wire may result in damage, etc. Do not stack multiple products on top of one another. Do not allow the product to come in contact with tools, etc. Do not apply excessive stress during installation. It may cause chipping and cracking,resulting in damage, etc. Provide clearance between the high-voltage section of this product and the frame body on which the product is installed and also the conductor section as on page 2, [1] "Outline". Do not use the product after it has been dropped because there is the possibility that components have been damaged.

•This inverter is for Four lamps. It has Dimming function(PWM System) and Remote function. •This product has shutdown function.

It prevents from keeping generating the high voltage when the lamps open.(Refer Note.4-3.) With lamp failure detector.

Normal Operation : CN1-6=0V

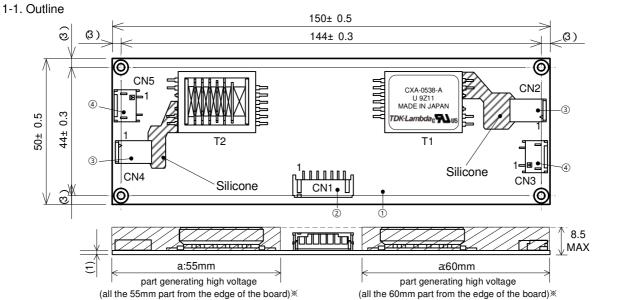

Some Lamps Open : CN1-6=5V

•This product adjusts the output current for the leakage current.

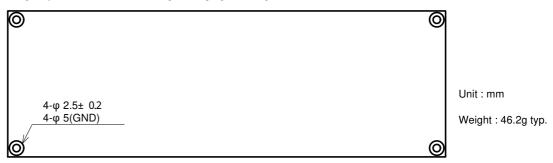

•The high-voltage area (terminals and patterns) is coated with silicone so as to avoid the defects caused by dust. •This product is conformity to RoHS directive. (*)

(*)Conformity to RoHS Directive:This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

[1] Outline

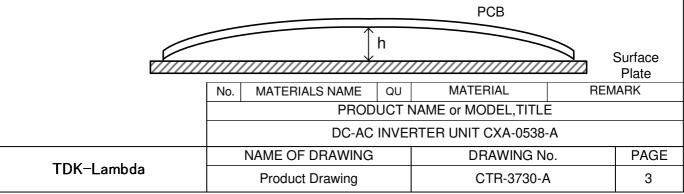

X Please secure 3mm or longer space distance from the high voltage generating area in all directions. Please see Note 1-3 for the details.

No.	Part Description	Material	Qu	Remark	Mates With

Note1-1. Marking of TDK part No, Date code, Country of origin.

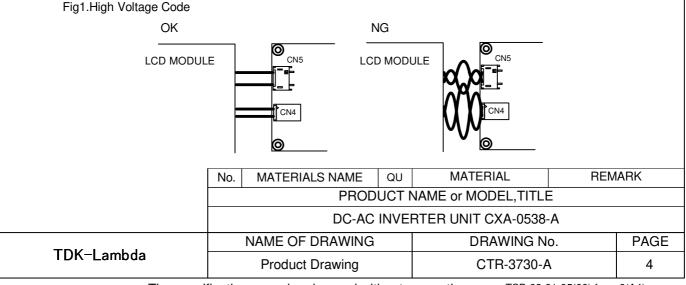

1) TDK part No., Date code, Country of origin, TDK-Lambda Logo, is marked on the transformer.

2) Date code example. (ex. Dec.11. 2009)

3) Country of origin code example. (ex. MADE IN JAPAN. MADE IN CHINA, MADE IN MALAYSIA).

- Note1-2. For circuit connection, please prefer to test circuit diagram [4].
- Note1-3. Please use minimum of 3mm clearance (all directions) between inverter high voltage area and any conductors. Please refer to mechanical drawing for marking of high voltage area.
- Note1-4. Open voltage (strike voltage) is measured across the transformer secondary winding at no load as the reading at the output connector would be less than the actual value.
- Note1-5. If the start up voltage falls below Cold Cathode Tube strike voltage, the CCFL will not light up easily specially at lower ambient temperature. Please review mounting instruction to avoid any abnormal operation due to coupling/leakage capacitance of inverter high voltage area to any surrounding conductor.

- Note1-6. Please check your lamp characteristic for minimum operational current and set the limit point in your design to avoid flickering and/or abnormal operation.
- Note1-7. For proper operation of circuit protection (fuse or IC PROTECTOR), Please use minimum of 6.3A capacity for input power supply.
- Note1-8. Impedence from the wire connection can cause a ripple in the input. The product has an internal fuse of 3.15A. Please check that input current peak wave form does not exceed 3.15A.

Note1-9. The cable of hight voltage must not come in contact with a metallic frame.

[2] Absolute maximum ratings

Items	Symbols	Specification	Unit	Notes
	Vin	0~15		
Input Voltage	Vrmt	0 ~ Vin	VDC	
	Vbr	0~16		
Load Resistance	RL1 ~ 4//CL1 ~ 4	100//6	kΩ //pF	
Operating Temp. range	Та	-30 ~ 80	°C	
Storage Temp. range	Ts	-30 ~ 85	°C	
Humidity range	RH	95	%RH	A maximum wet ball temperature is 38°C No dew.
