

Toe Clamp Set

Turn your machine into a production tool. This set of fixturing accessories provides rigid workholding without the use of tape or glue. The Toe Clamps are precision-machined from aluminum. Slide them into the T-slots, then tighten with hex keys to clamp your material. Easily fixture and remove materials with a simple turn of the hex key.

Note: as these accessories require the use of a T-slot bed, they are not compatible with the Kickstarter Othermill.
