THE BREADBOARDING MEDIUM FOR SURFACE MOUNT™

LDS6500A 3-9-99

6000 SERIES FOR DISCRETE COMPONENTS

MODELS 6510 AND 6520

FOR MORE COMPLEX CIRCUIT APPLICATIONS

The 6510 provides two 3-terminal component mounting zones, and multiple 2-terminal zones. The use of jumpers and foil modifications make more sophisticated prototype circuit modules possible. The 6520 repeats the pattern for double the mounting zones and possible circuit density. The 6520 is the largest standard model in the 6000 series

JUST ADD PARTS AND PLUG-IN™

FOIL MODIFICATIONS EXPAND VERSATILITY

Typical of many Surfboards are large pad areas which which may be modified to create additional part mounting zones or expand layout options.

- 1: Score foil with sharp razor to define new zone.
- 2: Apply heat with iron to delaminate foil section.
- 3: New mounting zone has been created.
- 4: Solder component to new mounting zone.
