

Network-Ready Vision System Series

F210ETN / F500ETN

*Ultimate Power - High Resolution (F500)
Network-Ready Vision System*

- Two digital camera ports, high resolution (1K x 1K) with F500ETN
- Advanced real time data logging and storage functions
- 10/100 Base TX Ethernet Port, USB, RS232/422, 33 digital I/O
- Optional VisionComposerNET for remote configuration/maintenance
- Security tools, audit trail creation in security sensitive environment

Security Function

The security function allows you to classify the operations of registered users into three ranks (Administrator, Supervisor, or Operator) depending on their access privileges.

| | |
|----------------------|--|
| Administrator | Change system data Register users Add access privileges |
| Supervisor | Add model data Re-register models Change inspection items |
| Operator | Change criteria Change display screens Adjust inspection regions |

Screen Captures

Previously, images were stored via a Compact Flash Card inserted into the Controller. It is now possible to capture network-transferred live images on a personal computer at any desired point in time.

Capture on personal computer

Recording

Live images sent by the Controller can be recorded by a personal computer using the AVI format. Effective for trend control.

Recorded by personal computer

Saved in AVI format

Logging

This function lets you accumulate a variety of production data, including images, measurement values, time stamps, production quantity, and defect rates. The macro function in the Controller then makes it possible to process this into the form of data that you need.
