

POLA[®] SOLID

Oriented Wire in Elastomer

Customer Value Proposition:

POLA SOLID is a composite electromagnetic interface (EMI) shielding and environmental sealing gasket material consisting of hundreds of individual fine wires embedded into the z-axis of solid elastomer.

Available in various flat seal configurations, including sheets, strips and die-cut parts, POLA SOLID is easily integrated into existing application assemblies, making the switch from a non-EMI solution possible.

With comparable performance at a fraction of the cost of alternative solutions that provide both EMI shielding and weather sealing performance, as well as the opportunity to exactly match the galvanic potential of interfacing aluminum surfaces, POLA SOLID provides total cost of ownership savings in excess of 50% through price point and corrosion rework reductions.

Features and Benefits:

- Solid silicone results in increased durability and sealing performance
- A solid silicone binder results in a robust gasketing material that can withstand greater fastener torque values as well as increased pressure and weather sealing requirements.
- Multiple wire alloy options allow for galvanic compatibility to be optimized between the gasketing and mating surfaces
- Galvanic compatibility allows for optimized corrosion mitigation and avoidance of related rework costs.
- Cured in place oriented wires will not dislodge, thereby eliminating foreign object debris concerns
- Elimination of foreign object debris ensures costly application rework due to electrical shorting can be avoided.
- Wire "bite-through" during gasket deflection allows for non-conductive pressure sensitive adhesive to be used rather than the conductive systems more commonly offered with EMI gasketing solutions
- The elimination of conductive pressure sensitive adhesive results in better adhesion and less galvanic corrosion potential for the overall system, thereby reducing both gasket installation labor and rework associated with corrosion.
- Various form factors are offered including strips, sheets and converted gaskets, thereby allowing for easy application and manufacturing integration
- Various form factors reduce secondary operations and capital expenditures commonly associated with gasket conversion.

POLA SOLID - Product Information

Table 1

MATERIAL SPECIFICATIONS					
Typical Properties	Solid Silicone	Solid Fluorosilicone	Wire Alloys		
			Aluminum ¹	Monel	Phosphor Bronze ²
Material Specification	A-A-59588 Class 3A, Grade 30	MIL-R-25988 Class 1, Grade 40, Type II	Alloy 5056, AMS-4182	QQ-N-281, AMS-4730	Alloy 30, ASTM B-105
Wire Diameter	-	-	0.005 in (0.13 mm)	0.0045 in (0.11 mm)	0.002 in (0.05 mm)
Temperature Range	-65 °F to 392 °F (-55 °C to 200 °C)	-65 °F to 392 °F (-55 °C to 200 °C)	See Below ³		
Recommended Compression	10% - 30%, (considering LMC & MMC) ⁴				
Recommended Closure Force	25 PSI to 100 PSI				
Compression Set	25%	25%	-		
Wire Population Density	900 ±15%	900 ±15%	-		

Notes

1. Except maximum tensile strength of 75,000 PSI
2. Non-standard, please inquire
3. Composite material is limited by sponge silicone temperature range
4. LMC: Least Material Condition, MMC: Maximum Material Condition

POLA SOLID SHEETS:

Sheets are available in standard widths up to 9 inches. Sheet larger than 9 inches will be supplied with two or more widths bonded together. Standard sheet lengths are 3 feet. Sheets can be converted with traditional cutting methods including steel rule dies or water jets.

Notes

1. To specify pressure sensitive adhesive, add -77 to the end of the part number
2. Contact Parker Chomerics for part number assistance with parts requiring non-standard phosphor bronze wire and fluorosilicone binder.
3. Contact Parker Chomerics regarding questions on part numbers formerly generated by Tecknit
4. Custom dimensions available upon request

POLA SOLID - Product Information

POLA SOLID STRIPS:

Strips are available in standard widths from .093 to 1.000 inches, with a recommend height to width ratio of no greater than 1:1. Standard strip lengths are 11 feet. Bonded continuous lengths are available upon request.

Twin strips are a variation of standard strips in that the oriented wires occupy only a portion of the total strip width. The unoccupied portion of the gasketing provides improved sealing and corrosion resistance for applications requiring optimized seal performance. Strips are available in widths 0.375" and larger, with the wire-occupied portion having a standard width of 0.250".

Notes

- To specify pressure sensitive adhesive, add -77 to the end of the part number
- Contact Parker Chomerics for part number assistance with parts requiring non-standard phosphor bronze wire and fluorosilicone binder.
- Contact Parker Chomerics regarding questions on part numbers formerly generated by Tecknit
- Custom dimensions available upon request

POLA SOLID - Product Information

FABRICATED GASKETS:

Parker Chomerics can provide finished gaskets utilizing a variety of cutting and bonding techniques. Compression stop integration is available upon request. Please contact Parker Chomerics directly for design assistance.

Table 5

DIE-CUT GASKET DESIGN PARAMETERS inches (mm)	
A Dimensional Tolerances <10 (<254) 10 to 15 (254 to 381) >15 (>381)	± 0.010 (0.25) ± 0.020 (0.51) $\pm 0.20\%$ of Nom. Dim
B Min. Width	0.125 (3.18)
C Min. Wall Thickness	0.080 (2.03)
D Min. Hole Diameter	0.060 (1.52)
E Slot	if min. wall thickness C cannot be accommodated, holes should be changed to slots.

Notes:

1. Die-cut gaskets should be inspected for dimensional compliance in a restrained condition.

Figure 1 DIE-CUT GASKET

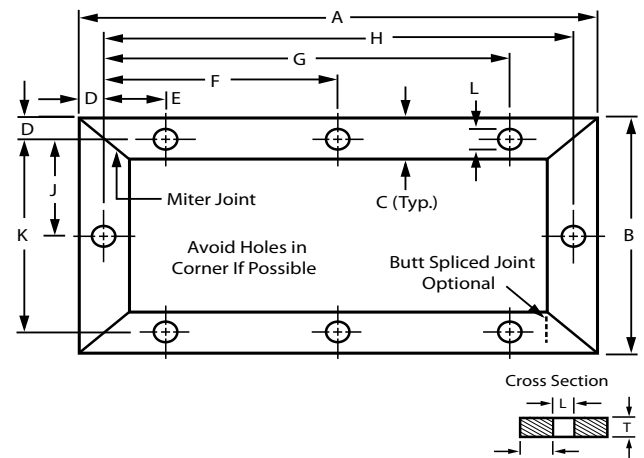

Table 6

SPLICED/DIE-CUT GASKET DESIGN PARAMETERS inches (mm)			
Dimensions	0-12.0 (0-30 cm)	12.1-24.0 (31-61 cm)	24.1-36.0 (61-91 cm)
A,B	± 0.03 (± 0.76)	± 0.06 (± 1.52)	± 0.12 (± 3.05)
C	(Width) See Table 2		
D	± 0.02 (± 0.51)	± 0.02 (± 0.51)	± 0.02 (± 0.51)
E, F, G, H, J, K	± 0.02 (± 0.51)	± 0.04 (± 1.02)	± 0.06 (± 1.52)
L	± 0.02 (± 0.51)	± 0.02 (± 0.51)	± 0.02 (± 0.51)

Notes:

1. Joint bonded with RTV silicone adhesive.
2. When B dim. is less than 4.5 inches (113 mm), POLASHEET, rather than POLASTRIP, may be used.
3. Die-cut gaskets should be inspected for dimensional compliance in a restrained condition.
