Description

The "Cool Power Technologies" CPZ5A48 DC-DC converter is an open frame isolated 32nd brick DC-DC module that conforms to DOSA standard 32nd brick specifications. The converter operates over an input voltage range of 36 to 75 VDC, and provides a tightly regulated output voltage with an output current rating of 5 A. The output is fully isolated from the input and the converter meets Basic Insulation requirements with 1500VDC I/O isolation rating. The standard feature set includes remote On/Off (positive or negative enable), input undervoltage lockout, output overvoltage protection, overcurrent and short circuit protections, output voltage trim, remote sense and overtemperature shutdown with hysteresis. The high efficiency of the CPZ5A48 allows operation over a wide ambient temperature range with minimal derating.

OUTPUT VOLTAGE TRIM

Output voltage adjustment is accomplished by connecting an external resistor between the Trim Pin and either the +Vout (or +Sense) or -Vout (or -Sense) Pins.

TRIM UP EQUATION:

$$R_{trim_up} = \left[\frac{5.1 \times V_{o_nom} \times (100 + \Delta\%)}{1.225 \times \Delta\%} - \frac{510}{\Delta\%} - 10.2 \right] \times k\Omega$$

Where R_{trim_up} is the resistance value in k-ohms and $\Delta\%$ is the percent change in the output voltage.

Figure 21. Trim UP circuit configuration

TRIM-DOWN EQUATION:

$$R_{trim_down} = \left(\frac{510}{\Delta\%} - 10.2 \right) \times k\Omega$$

Where R_{trim_down} is the resistance value in k ohms and $\Delta\%$ is the percent change in the output voltage.
