DHF030 Series | ITE & Medical Safety

30W/45W Peak

- 1.57" x 2.76" x 0.9" compact size
- Flexible installation for Class I/II
- 5,000 m operating altitude
- -40°C to 70°C convection cooling operation
- Up to 12,000uF loading start-up
- Level VI compliant eco-friendly design

Description

The **DHF030 Series** is a 30W, open-frame, Level VI compliant power supply that is a compact 1.57" x 2.76" x 0.9" in size. In addition to being an eco-friendly design, the series has an expanded, -40°C to +70°C, operating temperature range and is rated to an operating altitude of 5,000 m. The series has a 45W peak-power rating making it ideal for motor-starting/in-rush currents for ITE and Medical equipment, including MOOP and 2xMOPP, applications.

Specifications

Input

Input Voltage Input Frequency

Inrush Current

Input Protection No Load Input Power

Input Current

- 90 VAC to 264 VAC
- 47 Hz to 63 Hz
- 40/80A at 115/230 VAC, cold start, 25°C
- Internal T3.15A / 250 VAC fuse in line
- < 0.5W (< 1.5W for "A" version)
- 2A_{rms} max/115 VAC, 1 A_{rms} max/230VAC

Notes

1. Output Load:

Convection cooling: 30W, forced-air cooling: 36W

2. Peak Load Duration:

45W peak rating for durations up to 5 secs. Ideal for motor-starting/in-rush conditions.

3. Engineering Specification:

Contact Tri-Mag for full engineering specification for the specific part number used in your design application.

4. Standby Power Cosumption with System:

This is required by ENERGY STAR in U.S. and ErP regulation in Europe for appliances such as computers and displays. The latest requirement is measured input power to be less than 0.5W with system.

5. Audible Noise:

For the DHF030-x energy saving series, achieving level VI (<0.3W) standby power consumption is accomplished through burst mode operation of the controller. The burst operation frequency is dependent on load conditions and is approx. 114Hz, within the audible frequency range.

6. Step Efficiency and Average Efficiency:

Test conditions in step efficiency are referred to 3.2.2 IPS (Internal Power Supply) of the ENERGY STAR program requirements for computers. ENERGY STAR required for efficiency @ 20%, 50%, 100% load is 82%, 85%, 86%; average efficiency is the average of step efficiency.

7. Model Ordering Table:

Safety/Application	w/o Audible Noise	Energy Saving		
ITE & Medical	DHF030-xA	DHF030-x		

Mechanical Specifications

Notes

1. Mechanical drawing dimensions in mm, Tolerance: ± 0.4mm

2. Size: 40.0 x 70.0 x 23.5 Max. (mm)

1.57 x 2.76 x 0.93 Max. (inches) Net weight: Approx. 61g/unit

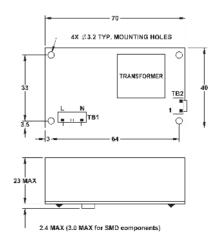

3. Connections: AC Input PCB Header: JST B2P3-VH or equivalent

Mating Connector: JST VAR-2, VHR-3N or equivalent

DC Output: PCB Header: JST B2P-VH or equivalent

Mating Connector: JST VHR-2N or equivalent
