Cable Acceptance Testing and Fault Locating

Greenlee's 920XC-20M is a handheld, full-featured OTDR for cable acceptance testing and fault locating. The Autotest function automatically chooses the optimal measurement settings, scans the fiber under test and performs fiber analysis displaying length of fiber and the loss of each event in an easy-to-read table. Also available is the graphical user interface to navigate the trace signature for more detailed views of specific fiber events.

The 920XC-20M OTDR is indispensable and the ideal tool that all premise technicians and LAN/WAN contractors need in their toolbox. The 920XC-20M series handheld OTDR is designed for enhanced user convenience with its large color LCD display and graphical user interface. The user can activate the measurements function easily by the press of one button.
