PCB antenna products can be customized as per application requirements. Parameters such as the dimensions or shape of the coil or its inductance can be altered. Antennas are provided with 2-conductor shielded cable, in lengths of 300 mm or 800mm, and terminated with a 4-pin connector JST PHR-4(RS Stock No. <u>820-1478</u>). We also ship a suitable 4-way socket JST B4B-PH-K-S(LF)(SN) (RS Stock No. <u>820-1434</u>) with each of our antennas to give users an "out of the box" complete bill of materials.

MIFARE, MIFARE Ultralight, MIFARE Classic are trademarks of NXP B.V.

No responsibility is taken for the method of integration or final use of the antenna
