Usage Precautions

1. Plugs

(1) Mating/ Unmating

- ① To disconnect the connector, insert the extraction tool (U.FL-LP(V)-N-2) under the connector flange. Pull in a perpendicular direction in line with the connector's mating axis. When removing the connector directly, hold the connector lid and pull out vertically in relation to the connector's mating axis. (Be careful not to damage the connector with fingers or nails.)
- ② When mating, align the mating axes between the receptacle and cable assembly, and insert the cable assembly downward and perpendicular into the receptacle. Do not insert the cable assembly at a slanted angle.

(2) Tolerable Load to a Cable After Mating

Once the connector has been mated do not apply forces exceeding the values in the diagram below.

(3) Precautions

Do not use excessive prying to mate or un-mate the connectors as it may lead to damage.

2. Receptacles

<p>(1) Recommended Reflow Temperature Profile</p>	 <ol style="list-style-type: none"> 1. Temperature refers to the temperature of the PCB surface at the terminal leads. 2. Reflow soldering should be performed at a printed circuit surface temperature of 250°C Max. 3. The temperature profile may vary depending on board size, solder used and solder thickness.
<p>(2) Recommended Manual Soldering Conditions</p>	<p>Manual soldering : 350°C for 5 seconds</p>
<p>(3) Recommended Metal Mask Thickness</p>	<p>0.1 to 0.12mm</p>
<p>(4) Reflow Cycles</p>	<p>2 times</p>
