# Vishay Semiconductors

# Optocoupler, Photodarlington Output, Dual Channel, **SOIC-8 Package**

# Isolation test voltage, 4000 V<sub>RMS</sub>

500 % minimum

**FEATURES** 

• Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

High current transfer ratio at I<sub>F</sub> = 1 mA,

### **DESCRIPTION**

The VOD233T is a high current transfer ratio (CTR) optocoupler. It has a GaAs infrared LED emitter and silicon NPN photodarlington transistor detector.

This device has CTRs tested at an LED current of 1 mA. This low drive current permits easy interfacing from CMOS to LSTTL or TTL.

### **AGENCY APPROVALS**

- <u>UL</u>
- cUL
- DIN EN 60747-5-5 (VDE 0884-5), available with option 1

### **Notes**

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute maximum ratings for extended periods of the time can adversely affect reliability.

#### Note

As per IEC 60747-5-2, §7.4.3.8.1, this optocoupler is suitable for "safe electrical insulation" only within the safety ratings. Compliance with
the safety ratings shall be ensured by means of prodective circuits.
