

RSAN SERIES

Multipurpose Single-Phase Filter Compatible with High-Voltage Pulse

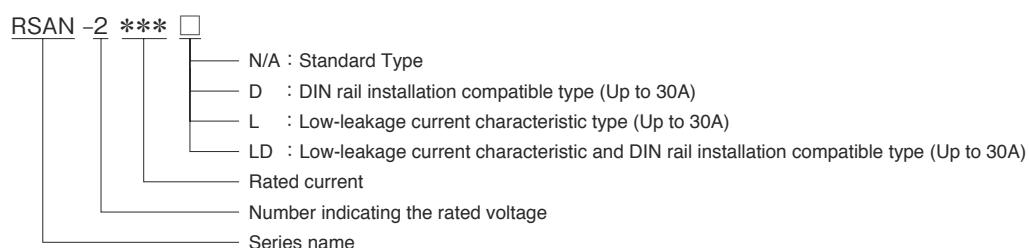

■ FEATURES

- Amorphous core is used as the common mode coil core for the RSEN series, which helps prevent device error.
- Self-tightening screws and an open/close type cover make wiring work easier.
- Optional low-leakage current characteristic type and DIN rail installation compatible type are also available.

*Please see the next page: "Precautions of DIN rail mounting".

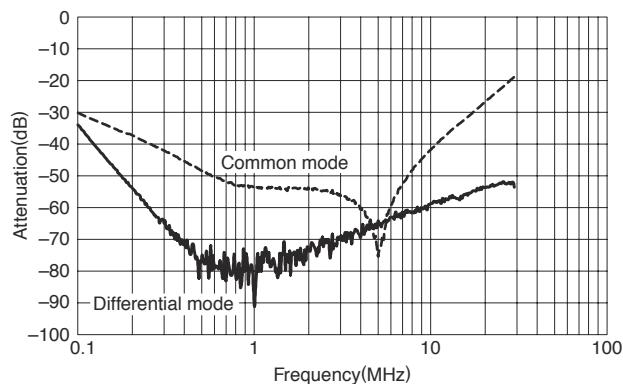

Precautions of DIN rail mounting

When installing on a DIN rail, secure a space with a depth of 14 mm or more from the top of the rail. If there is no depth space, the tip of the DIN attachment and the installation surface may interfere and it may not be possible to install it.
