

SiT3372

1 MHz to 220 MHz Ultra-low Jitter Differential VCXO

Description

The [SiT3372](#) is a 1 MHz to 220 MHz differential MEMS VCXO engineered for low-jitter applications. Utilizing SiTime's unique DualMEMS[®] temperature sensing and TurboCompensation[®] technology, the SiT3372 delivers exceptional dynamic performance by providing resistance to airflow, thermal gradients, shock and vibration. This device also integrates multiple on-chip regulators to filter power supply noise, eliminating the need for a dedicated external LDO.

The SiT3372 can be factory programmed for any combination of frequency, stability, voltage, output signaling, and pull range. Programmability enables designers to optimize clock configurations while eliminating long lead times and customization costs associated with quartz devices where each frequency is custom built.

The wide frequency range and programmability makes this device ideal for telecom, networking, and industrial applications that require a variety of pullable frequencies and operate in noisy environments.

Refer to [Manufacturing Notes](#) for proper reflow profile, tape and reel dimension, and other manufacturing related information.

Notes:

7. A pull-up resistor of 10 kΩ or less is recommended if pin 1 is not externally driven.
8. OE mode is only available in the 7050 and 5032 packages. 3225 package is NC.
9. A capacitor of value 0.1 μF or higher between VDD and GND is required. An additional 10 μF capacitor between VDD and GND is required for the best phase jitter performance.

Notes:

13. Top Marking: Y denotes manufacturing origin and XXXX denotes manufacturing lot number. The value of "Y" will depend on the assembly location of the device.
14. A capacitor of value 0.1 μ F or higher between VDD and GND is required. An additional 10 μ F capacitor between VDD and GND is required for the best phase jitter performance.
15. The center pad is internally connected to the GND pin. Soldering down the center pad to the GND is recommended for best thermal dissipation, but is optional.
