

## NVIDIA® Jetson AGX Orin™ Developer Kit: smallest and most powerful AI edge computer

SKU 110991725

NVIDIA® Jetson AGX Orin™ Developer Kit, provides a giant leap forward for Robotics and Edge AI. With up to 275 TOPS of AI performance and power configurable between 15W and 50W, you now have more than 6X the performance of NVIDIA® Jetson AGX Xavier™ in the same compact form-factor for developing advanced robots and other autonomous machine products.

## PRODUCT DETAILS

### Description

The newest member of Jetson Family, NVIDIA® Jetson AGX Orin™ Developer Kit, provides a giant leap forward for Robotics and Edge AI. With up to 275 TOPS of AI performance and power configurable between 15W and 50W, you now have more than 8X the performance of NVIDIA® Jetson AGX Xavier™ in the same compact form-factor for developing advanced robots and other autonomous machine products. With Jetson AGX Orin, developers can now deploy large and complex models to solve problems like natural language understanding, 3D perception, and multi-sensor fusion.

### Features

- **Most powerful AI computer for energy-efficient autonomous machines:** up to 275 TOPS, power configurable between 15W and 60W, supports multiple concurrent AI inference pipelines, plus high-speed interface support for multiple sensors.
- **Giant Leap forward compared to Jetson AGX Xavier:** 8 times AI performance in the same compact form-factor, built with new NVIDIA Ampere architecture with 2048 NVIDIA® CUDA® cores and 64 tensor cores, 12-core Arm Cortex-A78AE v8.2 64-bit CPU 3MB L2+6MB L3

- **Supports multiple concurrent AI inference pipelines** with onboard 64GB eMMC, 204 GB/s of memory bandwidth, and 32 GB of DRAM.
- **High-speed interface support for multiple sensors:** 22 lanes of PCIe Gen4, Gigabit Ethernet, 4 XFI interfaces for 10 Gigabit Ethernet, a Display Port, 16 lanes of MIPI CSI-2, USB3.2 interfaces, and 40-pin header.
- **Support Jetpack 5.0** installs Ubuntu 20.04 and supports entire NVIDIA JetPack™ and use-case-specific software platforms including Isaac for robotics, and Metropolis for smart cities.

## Applications:

Supported by NVIDIA JetPack™ and use-case-specific software platforms including Isaac for robotics, and Metropolis for smart cities, this developer kit provides everything you need to get started right away.

## NVIDIA Jetson-powered Edge AI platform at Seed

At Seed, you will find everything you want to work with [NVIDIA Jetson Platform](#) – official NVIDIA Jetson Dev Kits, Seed-designed carrier boards, and edge devices, as well as accessories.

Seed will continue working on the Jetson product line and will be ready to combine our partners' unique technology with Seed's hardware expertise for an end-to-end solution.

## Join Seeed as Edge AI Partner, Deliver Real-World AI Together

The banner features the Seeed Studio and NVIDIA logos in the top left corner. The main title "Seeed Edge AI Partner Program" is centered in a large, white, glowing font. Below the title, three bullet points describe the program's focus: "Designed to AI software enterprises, solution integrators and community experts", "Co-Inventing with Seeed", and "Delivering Real-World AI Together". At the bottom, two NVIDIA Jetson modules are displayed: a smaller carrier board on the left and a larger module on the right, both with the NVIDIA logo on their blue covers. The background is dark with a glowing green circuit board pattern.

# Seeed Edge AI Partner Program

- Designed to AI software enterprises, solution integrators and community experts
- Co-Inventing with Seeed
- Delivering Real-World AI Together

Seeed's Edge AI platform provides devices, carrier boards, peripherals, software tools, and ML solutions. Seeed is NVIDIA's official reseller and ecosystem hardware partner. By consolidating our best-in-class hardware and cutting-edge technology from our software partners and the community, we aim at helping both developers and enterprises deploy ML in the real world across industries. Contact us at [edgeai@seeed.cc](mailto:edgeai@seeed.cc)

We are looking forward to working with AI experts, software enterprises, and system integrators:

- Integrating your unique technology, resell or co-brand licensed solution with us.
- Building next-gen AI products powered by the NVIDIA Jetson module, one-stop bringing your product to the market with Seeed's manufacturing, fulfillment, and distribution.
- Working with Seeed Amazing Ecosystem Partners together, unlocking more AI possibilities.
