Preferred Device

# Self-Protected FET with Temperature and Current Limit

# 65 V, 6.5 A, Single N–Channel, DPAK

HDPlus<sup>™</sup> devices are an advanced series of power MOSFETs which utilize ON Semiconductor's latest MOSFET technology process to achieve the lowest possible on–resistance per silicon area while incorporating smart features. Integrated thermal and current limits work together to provide short circuit protection. The devices feature an integrated Drain–to–Gate Clamp that enables them to withstand high energy in the avalanche mode. The Clamp also provides additional safety margin against unexpected voltage transients. Electrostatic Discharge (ESD) protection is provided by an integrated Gate–to–Source Clamp.

#### Features

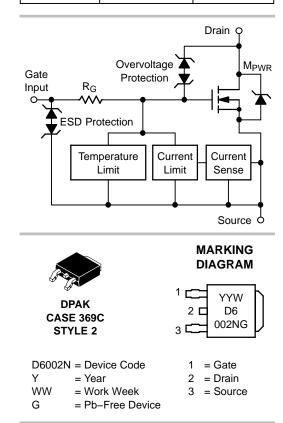

- Short Circuit Protection/Current Limit
- Thermal Shutdown with Automatic Restart
- I<sub>DSS</sub> Specified at Elevated Temperature
- Avalanche Energy Specified
- Slew Rate Control for Low Noise Switching
- Overvoltage Clamped Protection
- Pb–Free Package is Available
