Kinobo USB 2.0 Mini Microphone

COM-14125

This is a tiny USB Microphone from Kinobo that plugs into your laptop, desktop, Raspberry Pi, Jetson Nano Dev kit, anything with a USB port you may be using as a computer to add microphone functionality. There is no need to install any extra software as you OS should detect the device & automatically install it. Simply launch your program that requires microphone input and away we go!

Please note that this microphone is best used in a port that's not near your computer's cooling fan.

Features

- Works without drivers: just plug it in to your Windows PC for an instant microphone
- Good for Voice Dictation Software or Skype
- Portable, leave it plugged in to your laptop / notebook
- Omni directional noise-canceling mic picks up sound from longer distances
