

Product Data Sheet

Updated : March 1996 Supersedes : October 1993

Product Description

A green polyester film tape with a special conformable adhesive which resists plating bath chemicals.

Shelf Life

Physical Properties Not for specification purposes

 Adhesive Type
 Special blend of Silicone and Rubber

 Backing
 Transparent polyester

 Thickness (ASTM D-3652)
 100 μm

 Tape Colour
 Translucent green

Performance Characteristics

Not for specification purposes

Adhesion to Stainless Steel ASTM D-3330	2.7 N/10mm	
Tensile Strength ASTM D-3759	36.8 N/10mm	
Elongation at Break ASTM D-3759	56 %	
Temperature Range Maximum	90 °C	

12 months from date of despatch by 3M when stored in the original carton at 21°C (70°F) & 50 % Relative Humidity

Date: March 1996

851 Greenback Printed Circuit

Board Tape

Additional Product Information

Shelf life - important to rotate inventory.

Application Techniques

Low stretch polyester film for machine, as well as hand application.

Solvent clean-up of the board is recommended to facilitate subsequent soldering.

Tape must be firmly pressed down by equipment with rubber covered rollers or a rubber covered platen press. Hand rolling usually does not provide enough pressure. A vivid outline of the circuit leads indicates adequate pressure was used.

Applications

For masking printed circuit boards during solder stripping and precious metal plating of fingers. Splicing of silicone coated papers.

FEATURES ADVANTAGES BENEFITS Polyester backing. Reduces stretch and Saves money by reducing number of reject boards. recovery of tape and associated uneven stop-off line. Thick adhesive coating. Reduces undercutting Saves money by reducing because adhesive blocks reject boards. out solutions between fingers. Specially designed Saves energy and labour adhesive. Tape generally performs costs. better when no ovens are used to heat tape and boards. Saves money by reducing

Reduces adhesive transfer

to printed circuit board.
